infinito
infinito
product information

Designed by Toan Nguyen with an intentional, rigid exterior and a soft, relaxed interior, infinito™ brings the comforts of home into the office.

Infinito is extremely versatile. Based on a square modularity, it can generate many different configurations and combinations, involving all four directions and interacting with the surrounding architectural spaces. Each element can stand alone in the most traditional layouts or be combined to create island situations.

The low height and compact proportions favor conviviality and interaction among users, while the flexible orientation of the cluster arrangements offers a level of privacy.
