tek pier

blending collaboration & technology

Tek Pier is a wall-integrated, height-adjustable worksurface and monitor combination. Mounting to an Altos frame, hidden sit-stand actuators enable height adjustability, while an articulating monitor arm adjusts for individual group or collaboration. The single Lifting Column provides height adjustability from 24" to 43" for a flexible and ergonomic collaboration experience.

# features

## collaboration

- Tek Pier is offered in three different worksurface shapes for varying collaborative applications up to five people. The articulating Origami arm design allows a multitude of viewing angles, with easy-to-direct positioning. The arm provides flexibility for single-person use, or for collaboration during a meeting, articulating up to 30° side to side.

## height adjustability

- Tek Pier is an ergonomic workstation that allows both the worksurface and the monitor to be adjusted simultaneously for sitting and standing scenarios.
- The Altos wall provides necessary structural and electrical support for Tek Pier, while also acting as an acoustic barrier for single-sided and double-sided applications.

## technology

- Tek Pier is designed with anti-collision technology for safety considerations and can be controlled with an optional app on a mobile phone.
- HDMI, USB and Power is available to facilitate collaboration and electrical access. Cables are effectively managed, maintaining a clean and organized workspace.

# specifications

## altos wall sizing

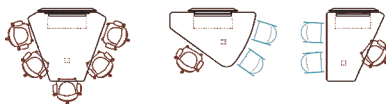

- Ceiling heights from 96" - 120" high in 1" increments
- Available 42" or 48" wide

## building accommodation

- Ceiling adjustment range: + 1 1/2", - 1/2"
- Floor adjustment range: + 1 1/2", - 1/2"

## worksurface shapes

- Spade (maximum five collaborators)
- Pie (maximum three collaborators)
- Wedge (maximum three collaborators)
- Single-sided or double-sided

## height adjustment

- Adjustment range from 24" - 43"

## finishes

- Altos fascia is available in Solid only
- Worksurface is available in Acrylic solid surface - Glacier White
- Lifting column and underside of surface available in Platinum or Very White

## technology

- Power, HDMI, USB
- Anti-collision capability
- Optional Desk-Controlled app
- Monitor provided by customer

## monitor mount

- Up to 30° articulation from side to side
- Accommodates monitors up to 35 lbs.
- Standard VESA patterns up to 15" x 15"
