

Teknion End of Life Program

Introduction:

As part of our commitment to sustainable practices and environmental responsibilities, Teknion's End of Life program offers a comprehensive menu of services through Teknion owned or third-party programs.

Mission:

Our goal is to re-distribute, whenever possible, redundant product to national and international programs that will assess the most appropriate life cycle channel available as an alternative to sending furniture to landfills.

Program Strategies:

Teknion's integrated network of dealers and internal sales teams will work with our customers to select from a menu of options the appropriate program that fit their needs. The below list of options include: refurbishing programs, resale programs, non-profit charitable organizations and licensed recycling facilities.

A final report will be provided to the customer confirming the completion of the furniture redistribution.

Teknion End of Life Program

Life Cycle Options available through Teknion Sales & Dealer Network

Supplier/Vendor	POC	Contact Info	Location	Recycle type
Teknion Certified Pre-Owned	Nancy Ethier	Nancy.ethier@teknion.com	North America	Re-purpose
Teknion TOS Refresh	Teknion Sales/dealers	Varies by region	North America	Re-purpose
ANEW	Rose Tourje	rose.tourje@anewfound.org	North America	Re-purpose/recycle
CSR-eco	Dan Leal	http://www.csr-eco-solutions.com/	North America	Repurpose/recycle

Teknion End of Life Program

Buy Back / Take Back / Leasing – maintain a list of options for the credit, like the TOS Refresh and others.

Introduction

As part of our commitment to sustainable practices and environmental responsibilities, Teknion's End of Life program offers a comprehensive menu of services through Teknion owned or third-party programs.

Mission

Our goal is to evaluate the existing client's products to offer a cost neutral solution where possible. In addition, a leasing option is available for clients who wish to "return" the product to the supply stream after a determined period of time to avoid landfill.

Program Strategies

An extensive evaluation is done by a third party to determine market value. Once determined, Teknion will work with leasing and client to establish a credit on new purchases based on existing products value.

In some cases existing products hold no market resale value. In this condition, products are either recycled or donated as corporate surplus to serve the community.

A final report will be provided to the customer confirming the completion of the furniture redistribution.
