upStage

Launched in June 2015, the upStage workplace furniture system is based on a simple platform or stage that frees users from the constraints of a benching frame or panel, allowing them to build along horizontal or vertical planes to create layered workspaces and multi-story volumes. Integrated in the stage, power and data offer choice by allowing the user to locate the plug-in anywhere along the stage or move it up onto the worksurface. Every element simply moves into place and fits together, offering innumerable combinations for dynamic, collaborative workplaces.

New features of the upStage offering include a leg option, privacy screen and storage unit. The Y Leg introduces a stylish new aesthetic and brings a signature attribute to the line. A Variable Privacy Desk-Edge Screen provides users with a fun and easy way to adjust levels of personal privacy desired. The Variable Privacy Hutch Stacker is another innovative means of customizing individual workspace. It completes the upStage stackers offering.

- 01 The Y Leg introduces a stylish new aesthetic
- 02 Variable Privacy Desk-Edge Screen provides user-controlled privacy
- 03 The Variable Privacy Hutch Stacker is another innovative means of customizing individual workspace

## hiSpace height-adjustable bench

hiSpace™ is the latest addition to Teknion's expanding height-adjustable bench offering. It creates benching environments for two to 16 users, provides a significant range of height adjustability from 25 to 50 inches (63.5 to 127cm), controlled wire management, modular electrics, simple specification, and quick and easy installation. hiSpace is built around the identical square profile leg found in the freestanding offering. Retractable digital display switch with memory is standard.

It is ideal for clients looking for a height-adjustable bench with a fully functional yet simpler offering than the Livello Height-Adjustable Bench, and at a lower price.

The hiSpace Height-Adjustable Bench informally invites users to choose how to work in their workstation.

01 hiSpace is a fully functional yet simpler offering than the Livello Height-Adjustable Bench, and at a lower price

## expansion casegoods height-adjustable options

Height adjustability is now an option with Expansion Casegoods Freestanding and Run-Off Desks. Height-adjustable options have been designed to match the aesthetic of Expansion Casegoods multi-level workstations. The innovative profile of the Bevel Leg provides elegant, discreet integration of the mechanism. The Bevel Leg is also available in fixed-height version to maintain consistency onto a floor plan.

## back-painted glass worksurfaces

Back-painted glass worksurfaces are now available on Expansion Casegoods Run-Off Desks, Freestanding Desks with Square Post Legs, and Meeting Tables. These worksurfaces can be ordered on fixed and height-adjustable Run-Off Desks.

## usb options

A new Dual USB Charging Outlet kit is available to retrofit any square or rectangular communication opening, such as in the Wall Panel and Power & Data Module.

A new Power Cube provides user access in height-adjustable workstations.

## design enhancements

Multi-level workstations are available with a standard 72-inch (183cm) datum height for both Cubic storage and Wall Panels.

To provide a lighter look and feel, back-painted glass doors now feature a minimalist frame. In addition, the toe kick on storage for secondary desks and towers has been removed.

01 Height adjustability is now an option with Expansion Casegoods Freestanding and Run-Off Desks

02 Back-painted glass worksurfaces are available on Expansion Casegoods Run-Off Desks, Freestanding Desks with Square Post Legs, and Meeting Tables

## optos low profile 12mm

Teknion's Optos Low Profile seamless glass wall system now includes a 12mm glass option. The 12mm thickness has higher STC rating than the 10mm and allows taller tempered glass applications to 120 inches. Glass widths up to 48 inches are standard. Wider glass fascias are also possible up to 60 inches. Additional handling requirements may be necessary for installation.

The Framed Pivot Door – the best door option for acoustic performance – is offered with 12mm glass. Corners, connections and trims are unique to 12mm products. Standard Glass Barn Door Frames and Standard Double Glass Barn Door Frames include a 12mm glass sidelight. The Barn Doors remain 10mm.

01

## sabrina task chair with fixed arms

A fixed polished aluminum arm is now offered on Sabrina, making the task chair ideal for meeting and conferencing, as well as executive applications.

02

## variable chairs cal-tb 133 compliant

Variable multi-purpose chairs are now built to comply to California Technical Bulletin 133, a standard for evaluating the flammability of furniture. Some material option exceptions apply.

04

05

## savera multi-tilt task chairs

In addition to the current offering, Savera task chairs are now available with a multi-tilt mechanism. The multi-tilt mechanism enables independent adjustment of the back tilt and seat tilt, and includes a forward-tilt capability.

03

## projek task chair for international delivery

Projek task chairs manufactured in North America are now available in a further knocked-down option – (K) Assembly Required – to maximize the number of chairs that fit inside an international shipping container.

# qui surfaces and seating

The Qui collection defines and creates environments to encourage meaningful dialogue between a multitude of colleagues, and small-format, touch-point areas for quick interactions and exchanges.

Designed by Monica Armani, the Qui collection evolved from the idea of creating a family of products geared towards the theme of versatility to respond to the new and diverse needs of life and work in the contemporary world. Components are conceived for use with great balance and harmony, to create comfortable and cozy spaces that can be lived and interpreted in different ways.

Ottomans are available in three diameters: 25.5, 44.5 and 60 inches (65, 113 and 152cm). Optional USB power is available in the large ottoman to integrate technology in the collaborative environment. The table collection offers a wide range of occasional, casual work and traditional worktables. Available in six different wood finishes. Qui screens to divide environments and create private meeting spaces are available in heights of 53 and 59 inches (135 and 150cm).

- 01 Qui collection of ottomans, tables and screens
- 02 Contrasting textile and thread application offers varied aesthetics

- 03 Optional wood finish on the ottoman mid-panel brings warmth and complements the wood table collection
- 04 A wide range of tables are offered in six wood finishes

## cover seating and table collection

The Cover seating and table collection plays in tune with any room, office or even home. With a high degree of upholstered comfort, Cover creates a light-scale environment perfect for quick meetings and conferencing, or a private nook for individual reflection. Designed by Claesson Koivisto Rune, Cover is inspired by how classically tailored garments are worn, in a layer-on-layer style. Coat on blazer. Blazer on waistcoat. Waistcoat on shirt.

Available in a Swivel Lounge Chair, 4-Leg Lounge Chair, Three-Seat Sofa and Ottoman. Contrasting textile applications allow for various configurations. Cover tables add a complementary workspace with an array of different styles. Coffee, Occasional, Work-Height and Bar-Height Tables are available in various tabletop surfaces.

## infinito lounge seating + masalla tables

Infinito brings a traditional lounge look with a not-so-classic feel to any scenario. Designed with an intentional, rigid exterior and a soft, relaxed interior, Infinito brings the comforts of home to the office.

Infinito was designed by Toan Ngyuen to be extremely versatile. Based on a square modularity, it creates many different configurations and combinations, involving all four directions and interacting with the surrounding architectural spaces. Each element can be used alone in the most traditional layouts, or be combined to create island environments.

The low height and compact proportions favor the conviviality and interaction of users, while privacy is obtained by taking advantage of the freedom of orientation in cluster arrangements.

The Masalla collection of occasional tables is based on the same concept of flexibility. It's up to the user to create with simple modules an almost unlimited number of personalized configurations, from the more minimal and monochrome to more colorful compositions.

## fractals & spectrum lounge seating

Power management capabilities have been introduced to Fractals and Spectrum Lounge Seating. USB and Standard outlet power enable users to plug in and recharge their mobile devices while accessing and sharing information.

01

02

01 Cover comprises a Swivel Lounge Chair, 4-Leg Lounge Chair, Three-Seat Sofa, Ottoman and tables

02 Infinito lounge seating brings the comforts of home to the office

## metropolitan '14 ottoman

An ottoman is now available with the Metropolitan lounge chair. The padded and upholstered ottoman serves as a stylish and comfortable footstool for the seated Metropolitan '14 user.

# flintwood veneer collection

Twelve new veneer design options have been introduced to the Flintwood veneer collection, including nine rift-cut and three cathedral patterns.

The new collection builds on the recently introduced laminate palette to enhance the finish, material options and expression of Teknion products for today's workplace.

Teknion's Flintwood is an excellent veneer finish for planning with coordinating furniture within a floor plate. It offers consistent color and pattern – often difficult to plan with using natural veneer. The rift-cut pattern, in particular, responds well to varied-scale furniture elements, resulting in a consistent furniture aesthetic.

Teknion's new Flintwood collection is inspired by the current trend of living naturally. Color temperatures – both warm and cool with new hues of grey and natural tones – result in a fresh, contemporary palette.

It is more common in today's office environments to mix and complement varied materials and finishes. The latest Flintwood veneer designs were created to work well independently, in proximity to the new laminates, and to integrate with the existing finish portfolio on Teknion furniture.

As structured with the new laminate collection, coordinate colors have been integrated into the new Flintwood palette to offer easier finish planning with the laminates.

The nine new rift-cut designs include:

- White Truffle (5T)
- White Oak (5N)
- Caraway (5V)
- American Walnut (5Z)
- Harvest Cherry (5Q)
- Earl Grey (5R)
- Drift Oak (5W)
- Silverwash (5S)
- Poppy Seed (5P)

The three new cathedral designs are:

- Raw Umber (5U)
- Dark Henna (5X)
- Black Timber (5Y)

The Flintwood collection now offers 23 designs in total. Signature additions include White Oak, American Walnut and a series of new Grey tones.

01 Harvest Cherry (5Q)	07 Raw Umber (5U)
02 Caraway (5V)	08 White Oak (5N)
03 Drift Oak (5W)	09 White Truffle (5T)
04 Black Timber (5Y)	10 Earl Grey (5R)
05 Dark Henna (5X)	11 American Walnut (5Z)
06 Silverwash (5S)	12 Poppy Seed (5P)

## xpress fabric additions

The textiles and finishes selection for Teknion's Xpress program has been updated and includes new panel and upholstery patterns and colors.

Recently introduced laminates and corresponding edge trim colors have also been added to the program, providing a well-rounded selection.

The complete offering can be viewed online. Access the Xpress Guide at [www.teknion.com/tools](http://www.teknion.com/tools) and download the Xpress Shipping Program.

## xpress updates for seating

Very White plastic finish options and Veil Grau Shrinx mesh are now offered on Projek Task Chairs included in Teknion's Xpress quick-ship offering.
