price & application guide

09.23.2024

# update summary

**Please be advised that information has been updated within the Height-Adjustable Bench Price & Application Guide. To highlight these updates, a summary has been created for your reference.**

## revised

Price increase has been incorporated.

Standard Up/Down Switch (S) has been added to the following products:

- Navigate Frame (HNBFA)
- Navigate 120 Frame(HNBFNT)
- Navigate Single-Sided Frame (HNBFNZ)

**Please note, first orders for new products will be accepted on September 23, 2024. All software will also be updated by September 23, 2024. If you have any questions regarding the information enclosed, please contact your Teknion Customer Service Representative.**

# what is navigate & hispace height-adjustable bench

**Height-Adjustable Bench creates benching workspaces that provide users individual control of their work and movement.**

## navigate

- Single or linked stations create a benching environment that fully supports user sit/stand ranges, technology requirements, and a high level of flexibility to create individual privacy
- Aesthetic and physical integration with Interpret & other Teknion products is achieved by an offering focused on surface details, common datum heights, multiple electrical packages and two ranges of height-adjustability
- A wide product and finish offering allows Height-Adjustable Bench to be planned at multiple price points

### height-adjustable bench workstations must include

- 1 Frame
- 2 Worksurface
- 3 End Covers or End Gables (End Cover Shown)

### height-adjustable bench workstations can include

- 4 Cable Channel
- 5 Screening (Desk Edge / Fixed / End of Run)
- 6 Electrical (Power Bars / Multi-Circuit)

The Height-Adjustable Bench is made up of a simple kit of parts including Frames, End Covers & Gables, Worksurfaces, Screens and Electrical Components.

## hiSpace

- Linked stations create a benching environment that fully supports user sit/stand ranges, technology requirements and a high level of flexibility to create individual privacy

### hiSpace height-adjustable bench workstations must include

- 1 Universal Frame
- 2 Worksurface x 2

### hiSpace height-adjustable bench workstations can include

- 4 Screening (Desk Edge / Fixed)
- 5 Electrical (Power Bars / Multi-Circuit) Only available on two or more sections (requires mid gable)
- 6 Cable Tray Cover

The Height-Adjustable Bench is made up of a simple kit of parts including a Universal Frame, Worksurfaces, Screens and Electrical Components.

# what is height-adjustable bench

## what is navigate & hispace height-adjustable bench (continued)

Navigate and hiSpace Height-Adjustable Bench can be specified on its own, or aesthetically integrated with other Teknion product settings. Navigate can also physically and electrically connect with Interpret.

### interpret

Navigate Height-Adjustable Bench with 51" datum, at end of Interpret run shown

The Navigate Height-Adjustable Bench can be integrated with Interpret either between or at the end of an Interpret run. Interpret intermediate legs will need to be replaced with end legs when integrating Height-Adjustable Bench. hiSpace Height-Adjustable Bench cannot be integrated into Interpret.

### district and leverage

hiSpace Height-Adjustable Bench with 42" datum, beside District freestanding workstations shown

When Navigate or hiSpace Height-Adjustable Bench is being specified with product lines such as District, Interpret and Leverage, matching datum heights and finishes allow for an easy aesthetic integration throughout a floor plan.

### journal

Navigate Height-Adjustable Bench with Journal desk height storage shown

The Navigate Height-Adjustable Bench can be integrated with various storage lines in an open office setting to provide additional storage and privacy for the user.

### expansion desking

hiSpace Height-Adjustable Bench with 42" datum, Expansion Desking storage shown

The hiSpace Height-Adjustable Bench can be integrated with various storage lines in an open office setting to provide additional storage and privacy for the user.

# navigate application guides

## understanding application guide pages

This application guide will include the following types of pages.

navigate application guides

understanding height-adjustable bench frames

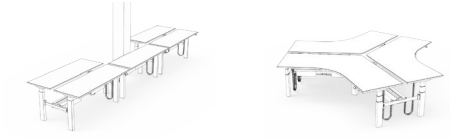

Navigate Height-Adjustable Bench can be specified with one frame providing a one or two person workstation or in runs with multiple connected frames, in Standard and Extended Range electric mechanisms.

Navigate Height-Adjustable Bench frames are ideal for collaboration in an optimized space that provides customized ergonomic comfort to users.

Navigate benches have two basic structures:

- Rectangular Frames - created with one or two worksurfaces
- 120 Frames - created with a minimum of three worksurfaces

The user can adjust the height of each workstation to meet their personal preference.

Each rectangular frame accommodates either a single user or two face to face users.

Each 120 frame accommodates three users.

All frames can be linked together to create innovative workstation clusters.

Frame Links connect two frames side by side to allow passage to continue between the frames and ensure accurate spacing.

Rectangular and 120 Frames can be connected to each other.

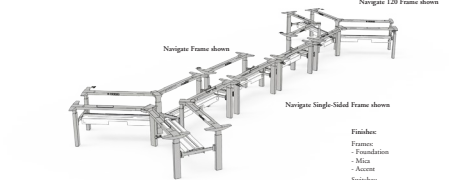

### understanding pages

Used to describe the intent and common features of a group of products.

navigate application guides

frame basics

Navigate Height-Adjustable Bench begins with a Navigate Frame which can be linked to additional frames. Each frame section accommodates one, two or three users. The Navigate Frame matches the leg profile of Navigate freestanding, work and meeting tables.

Features:

- Frames
- Foundation
- Mica
- Access
- Switches
- Up/Down Memory
- Entry Coordinates
- Toggle Up/Down Memory and Display
- Toggle with Memory and Navigate GPS
- Antennae
- Platform
- Grip Grip

- Height-Adjustable Ranges
  - Standard Range (27"-43")
  - Extended Range - Standard (25"-48.7")
  - Extended Range - Extended (22.6"-48.7") electric mechanism
- Switch Types
  - Display with Up/Down Memory
  - Toggle Up/Down
  - Display Toggle with memory and Navigate GPS
- Cross Channel Integrated Powdercoat available

### basics pages

Used to describe the details of each individual product including:

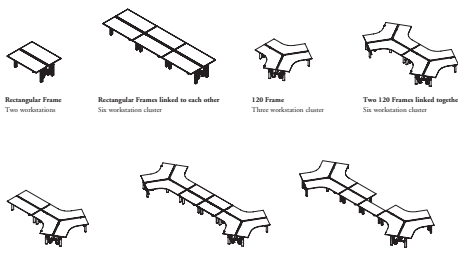

- Product codes
- Dimensions
- Options
- Features
- Links to the price page

navigate application guides

planning with frames

The following should be considered when planning with Frames.

Rectangular, 120 and Single-Sided Frames can be combined to create simple or innovative workstations.

Rectangular Frame Two workstations

Rectangular Frames linked to each other Six workstation cluster

120 Frame Three workstation cluster

Two 120 Frames linked together Six workstation cluster

One 120 Frame linked to one Rectangular Frame

Two 120 Frames linked to two Rectangular Frames

Two 120 Frames linked to one Rectangular Frame

### planning pages

Used to outline the rules and restrictions that should be considered when planning with products.

## navigate idea starters overview

The following layouts are available on the Teknion Planning Tool.

# understanding height-adjustable bench frames

**Navigate Height-Adjustable Bench can be specified with one frame providing a one or two person workstation or in runs with multiple connected frames, in Standard and Extended Range electric mechanisms.**

Navigate Height-Adjustable Bench frames are ideal for collaboration in an optimized space that provides customized ergonomic comfort to users.

Navigate benches have two basic structures:

- Rectangular Frames - created with one or two worksurfaces
- 120 Frames - created with a minimum of three worksurfaces

The user can adjust the height of each worksurface to meet their personal preference.

Each rectangular frame accommodates either a single user or two face to face users.

Each 120 frame accommodates three users.

All frames can be linked together to create innovative workstation clusters.

Frame Links connect two frames side by side to allow power to continue between the frames and ensure accurate spacing.

Rectangular and 120 Frames can be connected to each other.

120 Frame, three workstation cluster

120 Frame, three workstation cluster, linked to Rectangular Height-Adjustable Bench

Two 120 Frame three workstation clusters linked together

Two 120 Frame, three workstation clusters, linked to one Rectangular and one Rectangular Single-Sided Height-Adjustable Bench

# understanding height-adjustable bench frames (continued)

## rectangle frame

## height-adjustment ranges

Three height ranges are available:

- Standard Electric
- Extended Electric - Restricted
- Extended Electric -Extended

Each frame can have only one height-adjustment range, but can vary from frame to frame as they operate independently even though they are linked.

## collision detection

Collision Detection is a standard feature on all Navigate Height-Adjustable Bases and Tables.

The Collision Detection system detects when the table collides with an object in the up or down direction that substantially impedes the movement of the table. Once a detection is made, the table will stop, reverse direction by 1", display an error code on the control panel, and lock out all adjustment for a minimum of 3 seconds.

The detection works by continually comparing the overall power draw of the table when making height adjustments; in the event of an inconsistent power draw between the table legs, the Collision Detection's features activate.

## understanding height-adjustable bench frames (continued)

### 120 frame

### height-adjustment ranges

Three height ranges are available:

- Standard Electric
- Extended Electric - Restricted
- Extended Electric -Extended

Each frame can have only one height-adjustment range, but can vary from frame to frame as they operate independently even though they are linked.

  - Extended Range- Extended (22.6"-48.7") electric mechanisms
- Switch Types
  - Standard Up/ Down
  - Display with Up/ Down Memory
  - Toggle Up/ Down
  - Display Toggle with memory and Navigate GPS
- Cross Channel Integrated Powerbar available
- Cable Management Accessories available:
  - Cable Organizer with Felt Cover
  - Dual Plastic Trays with Powerbar
  - Dual Plastic Trays

### Finishes:

#### Frames:

- Foundation
- Mica
- Accent

#### Switches:

- Up/Down Memory
- Ebony Coordinate

#### Toggle Up/Down Memory and Display Toggle with Memory and Navigate GPS

- Anthracite
- Platinum
- Crisp Grey

### Navigate Frame (HNBFA)

- Used with two rectangular worksurfaces to create a bench
- Depths:
  - 48", 60" and 72"
- Widths:
  - 46"-94" in 6" increments

### Navigate 120 Frame (HNBFT)

- Used with three 120 worksurfaces to create a bench
- Depths:
  - 48" and 60"
- Widths:
  - 46", 52" and 58"

### Navigate Single-Sided Frame (HBNFZ)

- Used with one rectangular worksurfaces to create a bench
- Depths:
  - 24" and 30"
- Widths:
  - 46"-94" in 6" increments

## frame accessory basics

Navigate Height-Adjustable Bench offers options for linking frames to each other, the Interpret Bench and for concealing power.

### Navigate Wire Channel (HNBFCN)

- Mounts to the leg brace and conceals the power module, base feed, receptacles and power harness
- Depth:
  - 7"
- Widths:
  - 46"- 94" in 6" increments
- Available for Dual-Sided and Single-Sided Applications
- Navigate Wire Channel, Dual-Sided has a standard capacity of four duplex outlets (eight in total)
- Navigate Wire Channel, Single-Sided has a standard capacity of two duplex outlets (four in total)
- Includes data provision
- Includes removable side door for access to electrical outlets
- Finishes:
  - Foundation
  - Mica
  - Accent

### Navigate Frame Link (HNBFFN)

- Used to connect two Navigate Height-Adjustable Frames together
- Contains two brackets, one package is required for each bench connection
- The link is concealed by Mid Covers and Mid Gables
- Finished in Ebony

### Navigate Systems Link (HNBFSN)

- Used to join an Interpret Bench Frame to a Navigate Height-Adjustable Frame
- Includes an integrated wire management channel to allow for the continuation of modular electrics between products
- Finishes:
  - Foundation
  - Mica
  - Accent

## planning with frames

The following should be considered when planning with Frames.

Rectangular, 120 and Single-Sided Frames can be combined to create simple or innovative workstations.

**Rectangular Frame**  
Two workstations

**Rectangular Frames linked to each other**  
Six workstation cluster

**120 Frame**  
Three workstation cluster

**Two 120 Frames linked together**  
Six workstation cluster

**One 120 Frame linked to one rectangular frame**  
Five workstation cluster

**Two 120 Frames linked to two Rectangular Frames**

- Ten workstation cluster
- Creates a dog bone style workstation

**Two 120 Frames linked to one Rectangular Frame and one Single-Sided Frame**

- Nine workstation cluster
- Creates a dog bone style workstation
- Single-Sided Frame allows for impediments when planning

**Three 120 Frames linked to two Rectangular Frames**  
Thirteen workstation cluster or nine workstations with shared surfaces

**Three 120 Frames linked to one Rectangular Frame and one Single-Sided Frame**  
Twelve workstation cluster or nine workstations with shared surfaces

**Five 120 Frames linked together**

- Fifteen workstation cluster
- Creates a stock exchange style workstation

# planning with frames (continued)

## navigate single-sided frame

The Navigate Single-Sided Frame is paired with either Navigate Single-Sided Rectangular Worksurface (HNBWRS) or Navigate Single-Sided Rectangular Extended Worksurface (HNBWES) to create a Navigate Height-Adjustable Bench Single-Sided Stations.

### Single-Sided Bench

### Column Condition

### Wall Condition

## planning with frames (continued)

Navigate 120 Frames always include three bases. Neither single or double user applications are possible.

Navigate 120 Frames cannot be linked to 72" Navigate Rectangular Frames. All worksurfaces must be the same depth.

### switches

NOTE: Display switches include the following:

- Ability to change units from imperial to metric
- Ability to display the actual height of the table

Three types of switches are offered;

1. Display with Up/Down Memory
2. Toggle Up/Down
3. Display Toggle with Memory and Navigate GPS

#### Standard Up/Down (S)

- Basic up/down function

#### Display with Up/Down Memory (D)

- Basic up/down function
- Display
- Four programmable memory settings
- Error Code Read-Out

#### Toggle Up/Down (T)

- Basic up/down function
- Soft touch material
- Contoured shape for ease of use

#### Display Toggle with Memory and Navigate GPS (X)

- Large display
- Four programmable memory settings
- Navigate GPS: Teknion's Sit/Stand Guides and Reminders Aid
- Teknion Sit/Stand Reminders Aid
- Soft touch material
- Can be reprogrammed using Teknion Switch Configuration software
- Error Code Read-Out with QR Code

### leveling

Navigate Height-Adjustable Bench Frames allow for 3" of leveling. When more than 3" of leveling is required, a break in the bench run is necessary.

A site check prior to order is required to determine floor levels.

## planning with frames (continued)

### base frame integrated power bar and iec connection

The following options are available for base integrated power below the worksurface. Each can be specified as an option on Height-Adjustable Navigate Bench Frames.

#### No Electrics

- When no electrics are specified, a cover will be in place where electrics can be added
- Electrics can be added in the future

#### Cross Channel Integrated Powerbar

- Mounts inside the Cross Channel
- Four outlets and one internal cord that continues power through to the control box
- Available in table widths 46"-94"

For more information about planning with IEC connection and height-adjustability, refer to Complements: *Teknion's Ergonomics & Accessories Program*.

### wire management

The following options are available for wire management below the worksurface. Each can be specified as an option on the Height-Adjustable Navigate Bench Frames.

#### Cable Organizer with Felt Cover

- 7-1/2" width x 28" length
- Available on table widths 46" and larger
- Available on benches with 48", 60" depth (without central electrical grommet or rectangular grommet in center, without desk edge screen) and 72" depth
- Pilot holes on worksurfaces

#### Dual Plastic Trays with Powerbar

- Each Tray is 10" length x 4-3/4" width x 1-1/2" height
- Power Unit: 12" length x 1-1/4" width x 2" height
- Available on table widths 46" and larger
- Available on benches with 48", 60" and 72" depth
- No Pilot holes on worksurfaces

#### Dual Plastic Trays

- Each Tray is 10" length x 4-3/4" width x 1-1/2" height
- Available on table widths 46" and larger
- Available on benches with 48", 60" and 72" depth
- No pilot holes on worksurfaces

## worksurface basics

Navigate Worksurfaces are available for Rectangular Frames and 120 Frames with a variety of center gap options to accommodate casual screens.

Finishes:  
 - Source Laminate  
 - Foundation Laminate  
 - Grade 2 Laminate  
 - Flintwood  
 - Natural Veneer

- Corner profile:
  - Rounded
  - Square
- Cut out locations:
  - Left, Right and Center
  - Left and Right
  - Left
  - Right
  - Center

### Navigate Rectangular Worksurface (HNBWRN)

- Depths:
  - 22", 23", 28", 29", 34" and 35"
  - All depths are nominal and actual depths are half inch less than nominal depth to allow screen space
- Widths:
  - 46"-94" in 6" increments
  - All widths are actual to match the frame widths

### Navigate 120 Worksurface (HNBWTN)

- Depths:
  - 22", 23", 28" and 29"
  - All depths are nominal and actual depths are half inch less than nominal depth to allow screen space
- Widths:
  - 46", 52" and 58"
  - All widths are actual, to match the frame widths
- Rectangular Grommets cut out locations:
  - Left and Right
  - Left
  - Right

### Navigate Single-Sided Rectangular Worksurface (HNBWRS)

- Depths:
  - 22", 23", 28" and 29"
  - All depths are nominal and actual depths are half inch less than nominal depth to allow screen space
- Widths:
  - 46"-94" in 6" increments
  - All widths are actual to match the frame widths

### Navigate Single-Sided Rectangular Extended Worksurface (HNBWES)

- Depths:
  - 28" and 34"
  - All depths are actual
- Widths:
  - 46"-94" in 6" increments
  - All widths are actual to match the frame widths

# planning with worksurfaces

The following should be considered when planning with Navigate Worksurfaces.

## depths and widths

Depths of Navigate Rectangular Worksurface, Navigate 120 Worksurface and Single-Sided Worksurface are always nominal. Actual depth is 1/2" less to provide a 3" or 5" gap for space division. Depths for Navigate Rectangular Single-Sided Extended Worksurfaces are always actual. Widths for all worksurfaces are actual.

### Navigate Rectangular Worksurface

### Navigate 120 Worksurface

### Navigate Single-Sided Extended Worksurface

There is a 2" gap between a Navigate Single-Sided Rectangular Extended Worksurface and Corridor Screen.

Navigate Single-Sided Rectangular Extended Worksurface with Corridor Screens

Navigate Single-Sided Rectangular Worksurface with Corridor Screens

## planning with worksurfaces (continued)

**Worksurfaces for dual-sided applications are available with the following gaps:**

- 3" to allow for a screen that is fixed to the frame
- 5" to allow for two screens mounted to the worksurfaces
- 5" to allow for a screen fixed to the frame, and two screens mounted to the worksurface

When a 3" gap is required for a frame mounted screen, the following worksurface depths are used on each of the frame depths

- 23" deep worksurface on 48" deep frame
- 29" deep worksurface on 60" deep frame
- 35" deep worksurface on 72" deep frame (72" depth is not available on a 120 Frame)

When a 5" gap is required for a frame mounted screen, the following worksurface depths are used on each of the frame depths

- 22" deep worksurface on 48" deep bench
- 28" deep worksurface on 60" deep bench
- 34" deep worksurface on 72" deep bench (72" depth is not available on a 120 Frame)

### Single-Sided Rectangular Worksurfaces with Fixed Center Screens

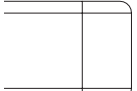

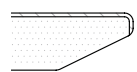

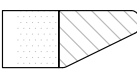

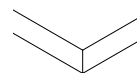

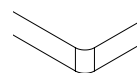

- There is a 1" or 2" gap between the Navigate Single-Sided Rectangular Worksurface and Fixed Center Screen depending on what depth of worksurface is specified.

# planning with worksurface edges

The following chart outlines the finishes available on each edge type.

		Source Laminate	Foundation Laminate Surface	Flintwood Surface	Natural Veneer Surface
<b>Flat (8)</b> All Edges			✓		
<b>Flat (9)</b> All Edges				✓	✓
<b>Flat (G)</b> All Edges					
<b>Full Knife (H)</b>			✓	✓	✓
<b>Full Knife (X)</b> All Edges					
<b>Straight Trim (6)</b> User Edge		✓	✓		
<b>Bullnose Trim (2)</b> User Edge			✓		
<b>Straight</b> User Edge		✓	✓	✓	✓
<b>Radius</b> User Edge		✓	✓	✓	✓

- Full Knife, Eased and Bullnose edge details are only on the user side. Non-user edges are always Flat Trim
- Bullnose user edge detail will always have a Straight profile on the ends. All other corner profiles are as selected

## planning with worksurface cut outs & grommets

When planning with worksurface cut outs and grommets two options are available:

- Rectangular cut out which allows cords to be routed from the worksurface top to below the worksurface (they are diamond shaped and include a rectangular cover)
- Navigate Surface Access Power Box is to be paired with a Navigate Rectangular Worksurface with Center Access Door cut out and Navigate Center Access Door to create a worksurface integrated user power solution

### rectangular cut out

Cut out locations:

- 5" on center from the non-user edge
- 8" on center from the side edge

Available:

- Left, Right and Center
- Both Left and Right
- Left
- Right
- Center (if a Center Access Door cut out is specified a center mounted cut out cannot be specified) for Rectangular Worksurfaces

Rectangular Grommet (YEEG) cap must be specified separately and is available through Complements: *Teknion's Ergonomics & Accessories Program*.

Navigate Rectangular Worksurface  
(Single-Sided and Dual-Sided applications)

Navigate 120 Worksurface

### center access door cut out

Grommet locations:

- Navigate Rectangular Worksurface:
  - 4-5/16" from the non-user edge
  - Center only
- Navigate 120 Worksurface:
  - 4-5/16" from the non-user edge
  - Center left
  - Center right

Navigate Rectangular Worksurface  
(Single-Sided and Dual-Sided applications)

Navigate 120 Worksurface

When a Center Access Door cut out is specified on a worksurface, a Navigate Center Access Door must be ordered separately.

In addition, Navigate Surface Access Power Box must be ordered separately to complete the worksurface integrated solution.

Navigate Center  
Access Door

Navigate Surface  
Access Power Box

## planning with worksurface cut outs & grommets (continued)

Navigate Center Access Door can only be specified with Cable Organizer with Felt Cover with 72" depth Navigate Rectangular Frames. Navigate Center Access Door **will not** work with Integrated Power Bar.

72" deep Navigate Rectangular Frames

48" and 60" deep Navigate Rectangular Frames

If you specify the Navigate Center Access Door and a Navigate Surface Access Power Box for a Single-Sided Frame application, only the Dual Plastic Trays can be specified for wire management.

Navigate Rectangle Worksurface with  
Navigate Center Access Door Dual  
Plastic Trays

58" Navigate Rectangle Worksurface  
with Navigate Center Access Door  
with Navigate Surface Access Power  
Box and Felt Cover Cable Organizer

## understanding space division

An variety of screens and covers are available to provide privacy for Navigate Height-Adjustable Bench users.

### mid and end covers & mid and end gables

Mid and End Covers and Mid and End Gables conceal the leg braces and wire connections from one frame to the next in the bench.

### desk edge screens

Desk edge screens provide privacy and raise and lower with the worksurface when user adjusts the height for their workstation.

### fixed center screens

Fixed center screens provide privacy in the seated position and maintain a uniform datum height when the workstations are at different heights..

### end of run screens

End of run screens provide privacy and spatial division at the end of a bench.

# mid & end covers basics

Mid and End Covers are available to conceal the exposed leg of the Frame.

Depths:

- 48", 60" and 72" to match frame sizes

Finishes:

- Solid and Metal Covers:
  - Foundation
  - Mica
  - Accent

**Navigate Mid Cover - Metal**  
(HNBCCMMN)

- Conceals the mid leg brace in rectangular frame applications
- Power pole option is available
- Wire Channel option is available

**Navigate 120 Mid Cover - Metal**  
(HNBCCMMT)

- Conceals the mid leg brace in 120 frame applications
- Power pole option is available
- Wire Channel option is available

**Navigate End Cover - Metal**  
(HNBCCEMN)

- Conceals the end leg brace in rectangular and 120 frame applications

**Navigate Single-Sided Mid Cover - Metal**  
(HNBCCMMS)

- Conceals the Navigate Single-Sided Frame leg brace in the mid location
- Cannot be used with a Power Pole

**Navigate Single-Sided End Cover - Metal**  
(HNBCCEMS)

- Conceals the Navigate Single-Sided Frame leg brace at the start or end of a run
- Power Pole option is available

## mid & end gables basics

Mid and End Gables are available to conceal the end and mid leg braces and extend to the floor.

Solid End Gable shown

### Finishes:

- Metal Gables and Solid Inner Gables:
  - Foundation
  - Mica
  - Accent
- Solid Outer Gables:
  - Source Laminate
  - Flintwood
  - Natural Veneer

### Depths:

- 48", 60" and 72" to match frame sizes

### Navigate Mid Gable - Metal (HNBCGMMN)

- Conceals the mid leg brace and extends to the floor in rectangular frame applications
- Power pole option is available
- Base feed option is available

### Navigate Mid Gable - Solid (HNBCGMSN)

- Conceals the mid leg brace and extends to the floor in rectangular frame applications
- Power pole option is available
- Base feed option is available

### Navigate 120 Mid Gable - Metal (HNBCGMMT)

- Conceals the mid leg brace and extends to the floor in 120 frame applications
- Power pole option is available
- Base feed option is available

### Navigate 120 Mid Gable - Solid (HNBCGMST)

- Conceals the mid leg brace and extends to the floor in 120 frame applications
- Power pole option is available
- Base feed option is available

### Navigate End Gable - Metal (HNBCGEMN)

- Conceals the end leg brace and extends to the floor in rectangular and 120 frame applications

### Navigate End Gable - Solid (HNBCGESN)

- Conceals the end leg brace and extends to the floor in rectangular and 120 frame applications

# mid & end gables basics (continued)

Mid and End Gables are available to conceal the end and mid leg braces and extend to the floor.

Navigate Single-Sided End Gable - Metal shown

Navigate Single-Sided Mid Gable - Metal shown

Navigate Single-Sided Transition Mid Gable - Metal, right shown

## Finishes:

- Metal Gables and Solid Inner Gables:
  - Foundation
  - Mica
  - Accent
- Solid Outer Gables:
  - Source Laminate
  - Flintwood
  - Natural Veneer

- Depths:
  - 48", 60" and 72" to match frame sizes

Navigate Single-Sided Mid Gable - Metal (HNBCGMS)

- Attaches to the Navigate Single-Sided Frame and the Navigate Height-Adjustable Bench Frame or 120 Frame leg braces in the mid locations in a run
- Power pole option is available
- Base feed option is available

Navigate Single-Sided Mid Gable - Solid (HNBCGMS)

- Attaches to the Navigate Single-Sided Frame and the Navigate Height-Adjustable Bench Frame or 120 Frame leg braces in the mid locations in a run
- Power pole option is available
- Base feed option is available

Navigate Single-Sided Transition Mid Gable - Metal (HNBCGMMR)

- Attaches to the Navigate Single-Sided Frame and the Navigate Height-Adjustable Bench Frame or 120 Frame leg braces in the mid locations in a run
- Base feed option is available
- Left or right handed option is available

Navigate Single-Sided Transition Mid Gable - Solid (HNBCGMSR)

- Attaches to the Navigate Single-Sided Frame and the Navigate Height-Adjustable Bench Frame or 120 Frame leg braces in the mid locations in a run
- Base feed option is available
- Left or right handed option is available

Navigate Single-Sided End Gable - Metal (HNBCGEMS)

- Attaches to the Navigate Single-Sided Frame leg brace

Navigate Single-Sided End Gable - Solid (HNBCGESS)

- Attaches to the Navigate Single-Sided Frame leg brace

## planning with mid & end gables

The following should be considered when planning with Mid & End Gables.

### mid gables

Solid and Metal mid gables wrap around the frame to conceal the legs.

#### Rectangular Frame

Has a two piece metal cap for access.

#### 120 Frame

Has a one piece metal cap for access.

#### Single-Sided Frame

Has a two piece metal cap for access.

## planning with mid & end gables (continued)

### end gables

#### Metal

The Metal End Gable is an infill that aligns with the legs of the frame.

#### Solid

The Solid End Gable is outward facing only and does **not** wrap around the legs of the frame. The leg brace is covered with a metal infill to the floor.

## planning with mid & end gables (continued)

### transition gables

#### Metal

The Transition Gable - Metal is an infill that aligns with the legs of the Rectangular Frame and Single-Sided Frame.

#### Solid

The Transition Gable - Solid is an infill that aligns with the legs of the Rectangular Frame and Single-Sided Frame.

Transition gables are handed.

# fixed center screen basics

Fixed Center Screens mount to the accessory beam of the Navigate Height-Adjustable Bench to provide privacy between users.

Navigate Fixed Center Screen - Fabric shown

- Used with worksurfaces that provide a 3" gap
- Heights:
  - 33" to achieve a 51" height datum

## Finishes:

- Fabric:
  - Panel Fabrics Gr. A, 1-5 COM
  - Upholstery Fabrics Gr. 1-10 COM
- Solid:
  - Source Laminate
  - Flintwood
  - Natural Veneer
- Glass:
  - Clear
  - Frost
- Trim bracket:
  - Foundation
  - Mica
  - Accent

Navigate Fixed Center Screen - Fabric (HNBCFF)

- Mounts to the accessory beam to provide solid privacy between users with a softer fabric aesthetic
- Available for inset applications
  - Inset Screen:
    - 12" narrower than the nominal dimension, providing a 6" inset on each side
- Widths:
  - 46" to 82" widths in 6" increments
- Glass thickness:
  - 10mm

Navigate Fixed Center Screen - Solid (HNBCFS)

- Mounts to the accessory beam to provide solid privacy between users
- Available for full width or inset applications
  - Inset Screen:
    - 12" narrower than the nominal dimension, providing a 6" inset on each side
  - Full Screen:
    - 4" narrower than the nominal dimension, providing a 2" inset on each side
- Widths:
  - 46" to 94" widths in 6" increments

Navigate Fixed Center Screen - Glass (HNBCFG)

- Mounts to the accessory beam to provide translucent privacy between users
- Available for full width or inset applications
  - Inset Screen:
    - 12" narrower than the nominal dimension, providing a 6" inset on each side
  - Full Screen:
    - 4" narrower than the nominal dimension, providing a 2" inset on each side
- Widths:
  - 46" to 82" widths in 6" increments
- Glass thickness:
  - 10mm

## desk edge screen basics

Desk Edge Screens mount to the Navigate Rectangular Worksurfaces to provide privacy between users and moves with the worksurfaces as the height changes.

Navigate Desk Edge Screen - Fabric shown

- Used with worksurfaces that provide 5" gap
- Heights:
  - 13" and 22" to achieve 42" and 51" datum

### Finishes:

- Fabric:
  - Panel Fabrics Gr. 1-5 COM
  - Upholstery Fabrics Gr. 1-10 COM
- Solid:
  - Source Laminate
  - Flintwood
  - Natural Veneer
- Glass:
  - Clear
  - Frost
- Trim bracket:
  - Foundation
  - Mica
  - Accent

Navigate Desk Edge Screen - Fabric  
(HNBCDF)

- Widths:
  - 46" to 82" in 6" increments

Navigate Desk Edge Screen - Solid  
(HNBCDS)

- Widths:
  - 46" to 94" in 6" increments

Navigate Desk Edge Screen - Glass  
(HNBCDG)

- Widths:
  - 46" to 82" in 6" increments
- Available in 6mm or 10mm thicknesses

# planning with fixed & desk edge screens

The following should be considered when planning with fixed and desk edge screens.

Screens extend 3 1/2" below the worksurface.

Two screen heights available to provide the most user privacy when worksurfaces are at different heights:

- 13" height, which is best suited for Standard Range frames
- 22" height, which is best suited for Extended Range Frames

- The Desk Edge Screen is mounted flush to the rear edge of the worksurface
- Pass through grommets will be required for wires to be routed below the worksurface

Desk Edge Screens are used with worksurfaces that provide a 5" gap. They will not fit with only a 3" gap.

When specifying the Desk Edge Screen it is important to consider the nominal vs. actual sizing.

- Desk edge screens are specified to match the worksurface dimension
- It is always inset 6" from the worksurface end on each side or 12" overall (for example a 76" worksurface and screen, the actual size of the screen will be 64")

## planning with fixed & desk edge screens (continued)

The Fixed Center Screen is 33"h and has an overall 51"h datum height. Must be used with worksurfaces with a 3" gap.

Fixed Center Screens are used with worksurfaces that provide a 3" gap.

When specifying the Fixed Center Screen it is important to consider the nominal vs. actual sizing.

- Fixed Center Screens are specified to match the worksurface dimensions
- It is always inset 1" from the worksurface end on each side or 2" overall (for example a 76" worksurface and screen, the actual size of the screen will be 74")

- Fixed Center Screens are specified to match the worksurface dimensions
- It is always inset 5" from the worksurface end on each side or 10" overall (for example a 76" worksurface and screen, the actual size of the screen will be 66")

# planning with fixed & desk edge screens (continued)

The two heights of desk edge screens allows for various levels of privacy between face to face users.

- The 13" height screen provides seated privacy, but not standing privacy
- The 22" height screen provides sitting and standing privacy
- The screens are sized to provide full privacy at desk height when one table is at its full height and the other at its lowest height

## Standard

## Extended

Fixed Screens and Desk Edge Screens have nominal dimensions. The following outlines the actual dimensions.

### Desk Edge Screens

Nominal Widths	Actual Widths
46	34
52	40
58	46
64	52
70	58
76	64
82	70
88 Solid Only	76
94 Solid Only	82

### Fixed Center Screens - Inset

Nominal Widths	Actual Widths
46	36
52	42
58	48
64	54
70	60
76	66
82	72
88 Solid Only	78
94 Solid Only	84

### Fixed Inset Screens - Full

Nominal Widths	Actual Widths
46	44
52	50
58	56
64	62
70	68
76	74
82	80
88 Solid Only	86
94 Solid Only	92

## end of run screen basics

Fabric Navigate End of Run Screens mount to the end of any bench to create a complete sense of privacy.

### Finishes:

- Fabric:
  - Panel Fabrics Gr. A, 1-5 COM
  - Upholstery Fabrics Gr. 1-10 COM
- Solid:
  - Source Laminate
  - Flintwood
  - Natural Veneer
- Trim bracket:
  - Foundation
  - Mica
  - Accent
- Gable and Cover:
  - Foundation
  - Mica
  - Accent

Navigate End of Run Screen - Fabric (HNBTEF)

- Heights:
  - 42" and 51"
- Widths:
  - 48", 60" and 72"

Navigate End of Run Screen - Solid (HNBTES)

- Heights:
  - 29", 42" and 51"
- Widths:
  - 48", 60" and 72"

Navigate End Screen Gable - Metal (HNBCGSMN)

- Conceals the end leg brace and extends to the floor in rectangular and 120 frame applications to attach to the End of Run Screen to the frame
- Depths:
  - 48", 60" and 72"

Navigate End Screen Cover - Metal (HNBCCSMN)

- Conceals the leg brace in rectangular and 120 frame applications to attach the End of Run Screen to the frame
- Depths:
  - 48", 60" and 72"

## end of run screen basics (continued)

- Heights:  
- 42" and 51"
- Widths:  
- 24" and 30"

### Finishes:

- Fabric:  
- Panel Fabrics Gr. A, 1-5 COM  
- Upholstery Fabrics Gr. 1-10 COM
- Trim bracket:  
- Foundation  
- Mica  
- Accent
- Gable and Cover:  
- Foundation  
- Mica  
- Accent

**Navigate Single-Sided End of Run Screen - Fabric (HNBTSF)**

- Left Hand or Right Hand

**Navigate Single-Sided End of Run Screen - Solid (HNBTS)**

- Left Hand or Right Hand

**Navigate Single-Sided End Screen Cover - Metal (HNBCCSMS)**

- Conceals the leg brace in rectangular single-sided applications to attach the End of Run Screen to the frame
- Depths:  
- 24" and 30"

**Navigate Single-Sided End Screen Gable - Metal (HNBCGSMS)**

- Conceals the end leg brace and extends to the floor in rectangular single-sided applications to attach to the End of Run Screen to the frame
- Depths:  
- 24" and 30"

## planning with end of run screens

The following should be considered when planning with end of run screens.

Screens must be specified with one of the following covers:

- End Screen Cover (HNBCCSMN)
- End Screen Gable (HNBCGSMN)

End of Run Screen with a End Screen Cover  
(HNBCCSMN)

End of Run Screen with a End Screen Gable  
(HNBCGSMN)

End of Run Screen with a Single-Sided  
End Screen Cover (HNBCCSMS)

End of Run Screen with a Single-Sided  
End Screen Gable (HNBCGSMS)

## corridor screen basics

- Heights:  
- 42" and 51"
- Widths:  
- 48" - 96" in 6" increments

### Finishes:

- Fabric:
  - Panel Fabrics Gr A, 1-5 COM
  - Upholstery Fabrics r 1-10 COM
- Solid:
  - Source Laminate
  - Flintwood
  - Natural Veneer
- Trim bracket:
  - Foundation
  - Mica
  - Accent
- Gable and Cover:
  - Foundation
  - Mica
  - Accent

Navigate Single-Sided Corridor Screen - Fabric (HNBLSF)

- Left Hand or Right Hand

Navigate Single-Sided Corridor Screen - Solid (HNBLSS)

- Left Hand or Right Hand

090

180

Navigate Single-Sided Screen Connection Bracket - Solid (HNBLBS)

## planning with corridor screens

The following should be considered when planning with corridor screens.

When planning with a Single-Sided Corridor Screen (HNBLS) and a Single-Sided Rectangular Worksurface (HNBWR), there will be a gap between the back edge of the worksurface and screen. To close the gap, specify an Extended Single-Sided Rectangular Worksurface (HNBWES).

- For a 24" Single-Sided Frame, specify a 28"d Extended Single-Sided Worksurface
- For a 30" Single-Sided Frame, specify a 34"d Extended Single-Sided Worksurface
- Extended Single-Sided Worksurfaces **cannot** be planned with any screen

Single-Sided Corridor Screen (HNBLS) and Single-Sided Rectangular Worksurface (HNBWR)

Single-Sided Corridor Screen (HNBLS) and Extended Single-Sided Rectangular Worksurface (HNBWE)

Single-Sided Corridor Screens (HNBLS) extend 1" from the end of each side of the worksurface.

Single-Sided End of Run Screens (HNBTS) can be specified with Single-Sided Corridor Screens (HNBLS) to create a closed corner.

# study carrel screen basics

The HAB Study Carrel Screen provides privacy for users and a distraction free environment.

## HAB Study Carrel Screen (GYKB)

- Study Carrels are complete screens that sit on top of a work surface to create privacy on three sides and raise with the work surface
- Heights when mounted to a 29" height Worksurface:
  - 13" (for a 42" datum height)
  - 22" (for a 51" datum height)
- Widths:
  - 48" to 84" in 6" increments
- Depths:
  - 18", 24", 30" and 36"
- Can be used full depth or partial depth
- Study Carrels cannot be used on radius corner work surfaces
- Power Access:
  - Cables cannot pass between the work surface and study carrel, a grommet is required in the work surface to route cables below
- Edge Trim Mounting Styles:
  - Study Carrel Screens are complete with a bracket for mounting to work surfaces with the following trim styles:
    - Straight
    - Flat
    - Full Knife
- It is recommended that:
  - Full depth carrels be used with the flat and knife edge
  - Partial depth carrels can be used with all edge styles

## power pole and base feed basics

Power and Data enter Navigate Height-Adjustable Bench from the floor with a Base Feed or from the ceiling through a Power Pole and Ceiling Feed.

### Navigate Base Feed Cover (HNBEC)

- Used to cover the base feed while routing power and data cables into a workstation from the floor
- Finishes:
  - Foundation
  - Mica
  - Accent

### Navigate Base Feed (HNBEBF)

- Provides routing for power from the floor to a Power Module through the Wire Channel
- Lengths:
  - 72" and 144"
- Available in two styles:
  - End condition for End Cover of a bench
  - Mid Condition for Mid Cover of a bench
- Wire systems include:
  - 8-Wire Isolated Ground (8T)
  - 8-Wire Dual Isolated (8K)
  - 7-Wire Non Isolated Ground (7T)
  - 7-Wire Dual Non Isolated (7K)

### Navigate Ceiling Feed (HNBECE)

- Routes power from the ceiling to the workstations through power pole
- Lengths:
  - 120" and 144"
- Wire systems include:
  - 8-Wire Isolated Ground (8T)
  - 8-Wire Dual Isolated (8K)
  - 7-Wire Non Isolated Ground (7T)
  - 7-Wire Dual Non Isolated (7K)
- Includes PVC free option if specified

### Navigate Split Base Feed (HNBEBFS)

- Provides routings for power from the floor to a Power Module with a Wire Channel and is wired into the building power source in two locations for New York City wiring restrictions
- Lengths:
  - 18" and 72"
- Available in two styles:
  - End condition for End cover of a bench
  - Mid Condition for Mid Cover of a bench
- Wire systems include:
  - 8-Wire Isolated Ground (8T)
  - 8-Wire Dual Isolated (8K)
  - 7-Wire Non Isolated Ground (7T)
  - 7-Wire Dual Non Isolated (7K)
- Includes PVC free option if specified

### Navigate Chicago Base Feed (HNBEBFCH)

- Required for city of Chicago electrical code requirements
- Lengths:
  - 72" and 144"
- Available in two styles:
  - End condition for End cover of a bench
  - Mid Condition for Mid Cover of a bench

### Navigate Chicago Ceiling Feed (HNBECECH)

- Required for city of Chicago electrical code requirements
- Lengths:
  - 120" and 144"

### Navigate Power Pole (HNBEP)

- Routes a ceiling feed and data cables from the ceiling to the workstation
- Heights:
  - 96" and 120"
- Available in three styles:
  - End condition
  - Mid Condition-Standard
  - Mid Condition-120

# planning with power poles and ceiling feeds

The following should be considered when planning with Power Poles and Ceiling Feeds.

The Power Pole routes a Ceiling Feed and data cables from the ceiling to a power module.

## navigate power pole, end condition

Power Poles attach to leg braces to allow power to be routed from the ceiling. The End Condition Power Pole will protrude 5" past the worksurface.

## navigate power pole, mid condition-standard

Power Poles attach to the Frame Link to allow power to be routed from the ceiling. When a power pole is used in a mid condition the Mid Cover must have the Power Pole provision. Worksurface must be specified with 5" gap on all sides of the Power Pole.

## navigate power pole, end condition - dual-sided

When specifying the End Condition Power Pole it can only be used with the Navigate End Cover - Metal.

A power pole cannot be used in the end condition with a metal or solid end gable.

## planning with power poles and ceiling feeds (continued)

### navigate power pole, end condition - single-sided

When specifying the End Condition Power Pole it can only be used with the Navigate Single-Sided End Cover - Metal.

A power pole cannot be used in the end condition with a Metal or Solid Single-Sided End Gable.

### navigate power pole, mid condition - single-sided

Power Pole, Mid Condition - Single-Sided attaches to the Frame Link (HNBFN). Cannot be combined with Rectangular Extended Worksurfaces.

Power Pole, Mid Condition can be specified with a Navigate Mid-Gable, Mid Condition with Power Pole.

Power Pole, Mid Condition cannot be specified in a transitional application.

# planning with power poles and ceiling feeds (continued)

## power pole with fixed center screens

When using Fixed Center Screens (HNBC), inset option must be specified. Fixed Center Screens are available in fabric, glass and solid. Worksurfaces must have a 5" gap on all sides of the Power Pole.

Fixed Center Screens - Inset can only be specified with Navigate 120 Bench when there is a power pole.

Fixed Center Screens - Full cannot be specified with Navigate 120 Bench if there is a power pole.

## planning with base feeds

The following should be considered when planning with Base Feeds.

### base feed with end gable

If power is required at the end of a run, a Base Feed Cover (HNBE) must be specified.

There is no cut out in the base of an end gable to route a base feed from floor monument up through gable to wire channel.

### base feed with mid gable

Navigate Mid Gables (HNBC) can be specified with or without a cut-out to accommodate a base feed.

If the floor monument is located outside of the Mid Gable, then the Mid Gable with Base Feed must be specified.

If the floor monument is located underneath the Mid Gable, then the Mid Gable without Base Feed must be specified.

## planning with base feeds (continued)

### base feed with transition condition

Navigate Single Sided Transition Mid Gable (HNBCG) can be specified with or without a cut-out to accommodate a base feed.

A Base Feed, Mid Condition must be specified when there is a transition condition.

If the floor monument is not directly below the transition mid gable then a Base Feed Cover must be specified.

## wire management basics

**Navigate Height-Adjustable Bench provides a modular electrics option for power and data distribution.**

The following outlines the basic components of modular electrics.

### Navigate Vertical Wire Carrier Vertical Cable Manager (HNBEEE)

- Mounts to Navigate Wire Channel and transfers vertical cables to the worksurface integrated center channel
- Finishes:
  - Ebony Coordinate
  - Platinum Coordinate
  - Very White Coordinate

### Navigate Power Module (HNBEPM)

- Mounts in the Wire Channel and accepts outlets for hardware electrics
- Includes module bezel
- Wire systems include:
  - 8-Wire Isolated Ground (7T compatible)
  - 8-Wire Dual Isolated (7K compatible)
- PVC free option available if specified

### Navigate Chicago Power Module (HNBPMCH)

- Required for city of Chicago electrical code requirements
- Standard 15 Amp, T-Slot 20 Amp, Controlled 15 Amp and Controlled 20 Amp available
- Bezel finished in Mica Platinum

### Navigate Single-Sided Chicago Power Module (HNBPSCH)

- Required for city of Chicago electrical code requirements
- Standard 15 Amp, T-Slot 20 Amp, Controlled 15 Amp and Controlled 20 Amp available
- Used for Single-Sided planning
- Bezel finished in Mica Platinum

### Navigate Receptacle Outlet (HNBERO)

- Mounts onto the Power Module to provide access to power
- Styles include:
  - Standard 15 amp
  - T-Slot 20 amp
  - Controlled 15 amp
  - Controlled 20 amp
- Outlet configurations consist of Circuit 1, Circuit 2, Circuit 3 (used with 8T only), Circuit 5, Circuit 6 (used with 8K only), Non IG Circuit (used with 7T and 7K only), Non IG Circuit (used with 7K only)
- Receptacle style D and E include a marking indicating it is connected to a control system
- Finished in Platinum

### Navigate Power Harness (HNBEPH)

- Routes powers from one power module to another
- Lengths:
  - 48", 60", 72", 84", 96", 120" and 144"
- Wire systems include:
  - 8-Wire Isolated Ground (8T)
  - 8-Wire Dual Isolated (8K)

## wire management basics (continued)

### Navigate I-Connector (HNBEIC)

- Used to join two harnesses when a single harness is not long enough

### Navigate Center Access Door (HNBECD)

- Allows users to access surface integrated outlets.
- Paired with a Navigate Rectangular Worksurface with Center Access Door cut out and a Navigate Surface Access Power Box to create a worksurface integrated user power solution
- Configuration:
  - 3 Power
  - 2 Power/1 USB-A/1 USB-C
- Power Cord Length:
  - 9' cord
  - 10' cord
  - 15' cord
- Country of Install:
  - Canada / USA Plug-In

### Navigate Surface Access Power Box (HNBEAP)

- Paired with a Navigate Rectangular Worksurface with Center Access Door cut out and a Navigate Surface Access Power Box to create a worksurface integrated user power solution
- Width: 9"
- Access Door Finish:
  - Foundation Colors
  - Mica Colors
  - Accent Colors

## planning with wire management and electrics

### wire channel

Wire Channels (HNBFCN) must always be specified the same width as the frame. A removable side door facing each end user for access to power modules is included.

- Built-in Interpret Accessory Beam that accommodates Navigate Fixed Center Screens (HNBC)
- Accommodates Navigate Vertical Wire Carrier Vertical Cable Manager (HNBE) that must be specified separately

Underside of Wire Channel (HNBFCN)

### power module and receptacles

Power modules (HNBE) are double-sided, face horizontally and accept four receptacle outlets (two on each side). The module is mounted horizontally on the Wire Channel and can be accessed easily from the side through a removable side door.

Power Modules with Navigate Frame

Power Modules with Navigate 120 Frame

Power Module (HNBEEPMT)

# planning with wire management and electrics (continued)

## vertical wire carrier

Navigate Vertical Wire Carrier Vertical Cable Manager (HNBE) allows for cables to be concealed and safely run from the worksurface to the wire channel. These are optional and must be specified separately.

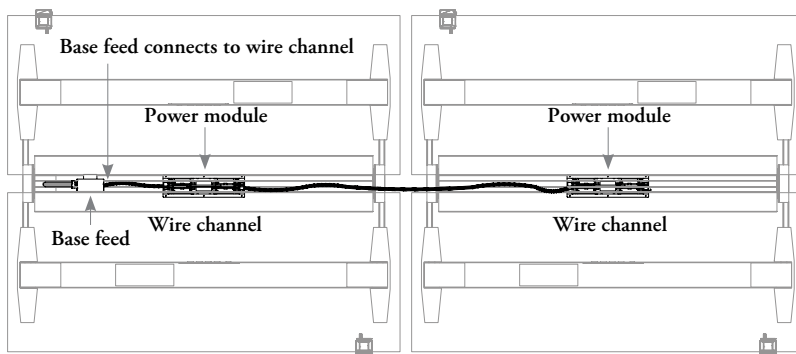

## power module and power harness

Power harnesses allow for non-directional routing so power can enter and exit from the same end of the power module. Up to four power harnesses can be used on one power module.

## harness lengths

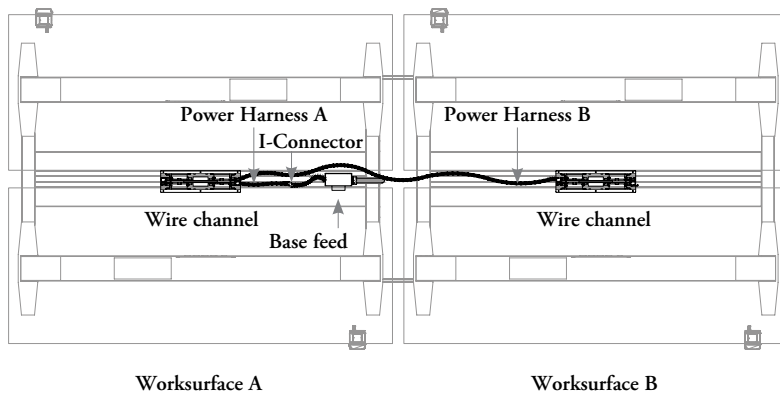

### Base Feed and Power Harnesses - End Condition

When a base feed is specified in the end condition, an extra harness is not required to connect to the power module in the wire channel. Measure the distance between power module to power module to calculate harness length required.

## planning with wire management and electrics (continued)

### Base Feed and Power Harnesses - Mid Condition

There are two extra harnesses required to be specified if power is at the Mid Condition.

Harness A must be specified to connect from the base feed to the power module. An i-connector is not required to be specified.

- If Worksurface A is 82" wide or less, specify a 48" long harness
- If Worksurface A is 88" wide - 94" wide, specify a 60" long harness

Harness B must be specified to connect Worksurface A to Worksurface B.

- Use the following formula to calculate the harness length required to connect Worksurface A to Worksurface B:
  - $\text{Worksurface A}/2 + \text{Worksurface B}/2 = x$  (harness length required)
  - If B is less than 72" wide, specify a 72" long harness
  - If B is between 72" and 84" wide, specify a 82" long harness

### Base Feed and Power Harnesses - 120

When calculating the harness length for 120 frames, specify the next size up from desk width.

- For 46"w 120 Frame, specify a 48" long harness
- For 52"w 120 Frame, specify a 60" long harness
- For 58"w 120 Frame, specify a 60" long harness

# wiring system

Four wiring systems are available for Interpret 8-Wire Isolated (8T), 7-Wire Non Isolated (7T), 8-Wire Dual Isolated (8K) and 7-Wire Dual Non Isolated (7K). Most common Teknion wiring configurations are achieved with these wiring systems.

For sites where Isolated Ground is not available, Teknion offers Non-Isolated Ground options for furniture wiring. The site electrician or electrical contractor/consultant can identify sites where Isolated Ground is not available. For those sites, please specify Teknion 7T or 7K wiring systems.

	No. Regular Circuits	No. Isolated Circuits
<b>8-Wire Isolated (8T) (3+1)</b> 	3	1
<b>8-Wire Dual Isolated (8K) (2+2)</b> 	2	2
<b>7-Wire Non Isolated (7T) (3+1)</b> 	4	0
<b>7-Wire Dual Non Isolated (7K) (2+2)</b> 	4	0

## wiring system/receptacles

	Wiring System			
	8T	8K	7T	7K
Regular Ground Receptacles	1, 2, 3	1, 2	1, 2, 3, A	1, 2, A, B
Isolated Ground Receptacles	5	5, 6	n/a	n/a

- All receptacles except Circuit 6, A, B can be used with the 8T wiring system (cannot accept a 2nd Isolated Circuit)
- All receptacles except Circuit 3 can be used with the 8K wiring system (cannot accept a 3rd Regular Circuit)
- Circuit A is compatible with 7T & 7K. Circuit B is compatible with 7K only

## wiring system/related circuit

	Wiring System			
	8T	8K	7T	7K
Regular Circuit 1 Receptacle	✓	✓	✓	✓
Regular Circuit 2 Receptacle	✓	✓	✓	✓
Regular Circuit 3 Receptacle	✓		✓	
Isolated Circuit 5 IG Receptacle	✓	✓		
Isolated Circuit 6 IG Receptacle		✓		
Regular Circuit A Receptacle			✓	✓
Regular Circuit B Receptacle				✓

✓ Applicable

### 15 Amp

### 20 Amp

- Outlets are available 15, 20 amp
- The 20 Amp is only available in Black
- Outlets are available with marking indicating it is connected to a control system in both 15 and 20 amp options

## power conservation system basics

Furniture based solution for the controlling function that addresses the ASHRAE/Title 24 electrical requirements.

### Navigate Power Conservation System (HNBEP)

- Up to two circuits can be controlled by occupancy sensors (included)
- Maximum of 4 sensors can be connected to each individual controlled circuit
- When using the Power Conservation System, circuits 3, 5, 6, A and B will always stay powered on (uncontrolled)
- To get individually controlled stations, specify the Power Conservation System with 2 sensors
- Available with option of 2, 4 or 8 sensors (Maximum of 4 sensors per run)
- Sensors mount to the underside of the worksurface
- A hard wired connection supplies power into a panel from the building power source
- Always specify one sensor per workstation
- Only one controlled circuit per workstation (do not specify two controlled circuits in one single workstation)
- Do **not** specify mix receptacles for both circuit 1 and 2 in a single workstation

# planning with power conservation system

The following should be considered when planning with the Power Conservation System.

The following are two ways of planning with the Power Conservation System.

## scenario A: multiple sensor planning

The connection between two power modules only applies on the installation for 4 sensors and 8 sensors.

## scenario B: single sensor planning

- Always specify one sensor per workstation
- Only one controlled circuit per workstation (do not specify two controlled circuits in one single workstation)
- Do not specify mix receptacles for both circuit 1 and 2 in a single workstation

H N B F N A

Navigate Frame

One Table  
One Plug

The Navigate Frame is paired with Navigate Rectangular Worksurface (HNBWRN) to create a Navigate Height-Adjustable Bench Double-Sided Station.

WHAT’S INCLUDED

Each frame includes 2 height-adjustable mechanisms, 2 switches, 4 height-adjustable legs with levelers, 2 cross channels, 2 leg braces, appropriate hardware.

NOTES

Requires two Navigate Rectangular Worksurfaces (HNBWRN) and one Navigate Wire Channel (Dual Sided - Standard). Requires Covers/Gables to conceal leg braces, 3" of leveling.

All electric base mechanisms have a 0.1 Watt resting power draw and use 120V North American control box.

For Switch details, see the Application Guide section.

Cross Channel Integrated Powerbar option (C) includes 3 outlets + 1 IEC Connection. This IEC connection accepts only one IEC-compatible power accessory (with an IEC cord terminal) at a time.

Undersurface cable management option (5) - Dual Plastic Trays + Powerbar with IEC refers to a Power Rod (with IEC cord terminal) that must be plugged into the IEC connection of the Cross Channel Integrated Powerbar option (C).

For more information about the One Table One Plug electrical system, IEC-compatible power accessories and planning with IEC Connection, refer to Complements: Teknion’s Ergonomics & Accessories Program.

H N B F N T  
Navigate 120 Frame

One Table  
One Plug

The Navigate 120 Frame is paired with Navigate 120 Worksurface (HNBWTN) to create a Navigate Height-Adjustable Bench 120 Station.

WHAT’S INCLUDED

Each 120 Frame includes 3 height-adjustable mechanisms, 3 switches, 9 height-adjustable legs with levelers, 6 cross channels, 3 end leg braces, 3 mid leg braces, appropriate hardware.

NOTES

Requires three Navigate 120 Worksurfaces (HNBWTN) and one Navigate Wire Channel (Dual Sided - Standard). Requires Covers/Gables to conceal leg braces. 3" of leveling.

All electric base mechanisms have a 0.1 Watt resting power draw and uses 120V North American control box.

Cross Channel Integrated Powerbar option (C) includes 3 outlets + 1 IEC Connection. This IEC connection accepts only one IEC-compatible power accessory (with an IEC cord terminal) at a time.

Undersurface cable management option (5) - Dual Plastic Trays + Powerbar with IEC refers to a Power Rod (with IEC cord terminal) that must be plugged into the IEC connection of the Cross Channel Integrated Powerbar option (C).

For more information about the One Table One Plug electrical system, IEC-compatible power accessories and planning with IEC Connection, refer to Complements: *Teknion’s Ergonomics & Accessories Program*.

Navigate Single-Sided Frame

One Table  
One Plug

The Navigate Single-Sided Frame is paired with either Navigate Single-Sided Rectangular Worksurface (HNBWRS) or Navigate Single-Sided Rectangular Extended Worksurface (HNBWES) to create a Navigate Height-Adjustable Bench Single-Sided Station.

WHAT'S INCLUDED

Each frame includes 1 height-adjustable mechanism, 1 switch, 2 height-adjustable legs, 2 support legs with counter-weight, 1 cross channel, 2 leg braces, appropriate hardware.

NOTES

Requires 1 Navigate Single-Sided Worksurface, 1 Navigate Wire Channel (Single-Sided), selection of Single-Sided Covers / Gables to conceal leg braces. 3" of leveling.

Electric base mechanisms has a 0.1 Watt resting power draw and use 120V North American control box.

For Switch details, see the Application Guide section.

Cross Channel Integrated Powerbar option (C) includes 3 outlets + 1 IEC Connection. This IEC connection accepts only one IEC-compatible power accessory (with an IEC cord terminal) at a time.

Undersurface cable management option (5) - Dual Plastic Trays + Powerbar with IEC refers to a Power Rod (with IEC cord terminal) that must be plugged into the IEC connection of the Cross Channel Integrated Powerbar option (C).

For more information about the One Table One Plug electrical system, IEC-compatible power accessories and planning with IEC Connection, refer to Complements: Teknion's Ergonomics & Accessories Program.

H N B F C N

Navigate Wire Channel

The Navigate Wire Channel conceals and manages the modular electrical systems selected (ordered separately), wiring, data and communication cables. The Wire Channel includes a top mounted Interpret Accessory Beam to mount Fixed Center Screens.

WHAT’S INCLUDED

1 electrical channel, 1 Interpret accessory beam, 1 data bracket, 1 cable wrap, M-Clips (quantity dependent on channel length), 2 vertical power covers, mounting hardware.

NOTES

Covers are provided to conceal Vertical Wire Carrier attachment locations if unused.

Vertical Wire Carriers are ordered separately (HNBEEE).

Finished top trim is included and must be removed to mount Fixed Center Screens

Navigate Rectangular Worksurface

The Navigate Rectangular Worksurface is to be paired with the Navigate Frame (HNBFN) to create a Navigate Height-Adjustable Bench Double-Sided station.

WHAT’S INCLUDED

1 worksurface, cut outs (if specified), mounting hardware.

NOTES

Actual Depth is calculated as the stated Nominal Depth minus 0.5".

Center Access Door cut out must be specified to include a Navigate Center Access Door and Navigate Surface Access Power Box to create a worksurface integrated user power solution.

Flintwood and Natural Veneer are not available on Rounded corner profiles.

Navigate Single-Sided Rectangular  
Extended Worksurface

The Navigate Single-Sided Rectangular Extended Worksurface is to be paired with the Navigate Single-Sided Frame (HNBFNZ) when a Corridor Screen is present to create a Navigate Height-Adjustable Bench Single-Sided station with minimal surface gap.

WHAT’S INCLUDED

1 worksurface, cut outs (if specified), mounting hardware.

NOTES

Actual Depth is calculated as the stated Nominal Depth minus 0.5".

Navigate Center Access Door cut out must be specified to include a Navigate Center Access Door and Navigate Surface Access Power Box to create a worksurface integrated user power solution.

Flintwood and Natural Veneer are not available on Rounded corner profiles.

HNBCDF  
Navigate Desk Edge Screen – Fabric

The Navigate Desk Edge Screen - Fabric mounts directly to the worksurface to create privacy and physical separation at any height on a Navigate Height-Adjustable Bench worksurface.

**WHAT’S INCLUDED**  
1 fabric screen, mounting hardware.

**NOTES**  
All Desk Edge Screens mount flush to the rear edge of the worksurface. Desk edge accessories can not be used along the rear edge of the worksurface. Wire management on the surface should be managed by the use of cut outs and grommets (ordered separately).  
Worksurfaces should be specified with a resultant depth clearance of 5".  
13" Height provides visual privacy when used with Standard Electric base mechanism.  
22" Height provides visual privacy when used with Extended Electric base mechanism.

The Navigate Desk Edge Screen - Glass mounts directly to the worksurface to create privacy and physical separation at any height on a Navigate Height-Adjustable Bench worksurface.

#### WHAT'S INCLUDED

1 glass screen, mounting hardware.

#### NOTES

All Desk Edge Screens mount flush to the rear edge of the worksurface. Desk edge accessories can not be used along the rear edge of the worksurface. Wire management on the surface should be managed by the use of cut outs and grommets (ordered separately).

Worksurfaces should be specified with a resultant depth clearance of 5".

13" Height provides visual privacy when used with Standard Electric base mechanism.

22" Height provides visual privacy when used with Extended Electric base mechanism.

### GYKB Study Carrel Screen

Page 138

GYKB  
Study Carrel Screen

The Study Carrel Screen attaches to the top of the worksurface to provide space division on both the back and lateral edge, therefore providing territorial desktop privacy.

WHAT’S INCLUDED

1 framed fabric desk edge screen, attachment brackets.

NOTES

Framed Study Carrel Screens is designed to match the width and depth of the worksurface for tight fit applications. For partial application, specify the depth of the Study Carrel a size down from the worksurface depth.

Desktop grommet is required for wire pass-through. Fabric will be applied in the railroad direction in select Panel and Upholstery fabrics, please refer to the *Teknion Textiles Program Guide*.

Study Carrels **cannot** be used on radius corner worksurfaces.

The Navigate Split Base Feed delivers power from the floor to the Power Module. It is wired to the building power supply in two places for New York City wiring restrictions.

#### WHAT'S INCLUDED

1 base feed harness, junction box, I-connector, mounting hardware, additional cover is included when End Condition (E) is specified.

#### NOTES

In the End Condition (E), the Split Base Feed can connect directly to the Power Module when the I-connector is removed. An additional Power Harness is not required to make this connection.

In the Mid Condition (M), the Split Base Feed module mounts directly to the Frame Link using an additional bracket (included). A 48" Power Harness is required to connect to the Power Module in the Wire Channel.

The Navigate Surface Access Power Box is to be paired with a Navigate Rectangular Worksurface with Center Access Door cut out and Navigate Center Access Door to create a worksurface integrated user power solution.

#### WHAT'S INCLUDED

Surface Access Power Box, power cord with specified length.

#### NOTES

Requires Center Access Door cut out to be specified in the applicable worksurface.

Requires Center Access Door.

Pilot holes are present for installation on the underside of the worksurface when the Center Access Door cut out is specified.

Always includes a data cover plate.

Data cover plate finished in Platinum Coordinate.

USB-A port supplies 10 Watts (5VDC) when used in single port mode.

USB-C port supplies 18 Watts (5/9/12VDC) when used in single port mode.

USB-C port will support Quick Charge when used in single port mode.

When both ports are used at the same time, output may be reduced.

HNBEPC  
Navigate Power Conservation System

The Navigate Power Conservation System provides an automatic power switch to workstation outlets on circuit 1 and 2.

**WHAT’S INCLUDED**  
1 control box, sensors (specified quantity), connection brackets, cables, 4-way splitter, mounting hardware.

**NOTES**  
Automatic shut-off timer is factory set at 20 minutes.  
Sensor connection cables finished in Grey and White.  
System Control Box finished in Platinum.  
System control box is available in Platinum (Foundation) only. Each Control Box offers two separate output jack for connection of Occupancy Sensors. The first output jack controls power to all receptacles on Teknion Circuit 1 and the second output jack controls power to all receptacles on Teknion Circuit 2. Each of the output jacks is labeled on the control box.

Always specify one sensor per workstation.  
Only one controlled circuit per workstation (do not specify two controlled circuits in one single workstation).  
Do not specify mix receptacles for both circuit 1 and 2 in a single workstation.

# understanding hiSpace bench frames

**hiSpace Height-Adjustable Bench frames are ideal for the work environment, providing users with customized ergonomic comfort.**

hiSpace frames have two basic structures:

- Rectangular Frames - created with one or two worksurfaces
- 120 Frames - created with a minimum of three worksurfaces

The user can adjust the height of each worksurface to meet their personal preference or they can be ordered as fixed frames.

Double-Sided Bench

Single-Sided Bench

120 Bench

## hispace frames overview

- Linked stations create a benching environment that fully supports user sit/stand ranges, technology requirements and a high level of flexibility to create individual privacy
- Height-Adjustable Bench is made up of a simple kit of parts including a frame (double-sided, 120, or single-sided), worksurfaces, electrical components and screens that all must be specified separately

### double-sided frame

## hispace frames overview (continued)

### single-sided frame

- 1 hiSpace Leg Column
- 2 Worksurface Strut
- 3 Telescopic Top Frame
- 4 Leveler
- 5 Digital Switch
- 6 Vertical Wire Carrier (optional)

## hispace frames overview (continued)

### 120 frame

# hispace frame basics

The hiSpace Height-Adjustable Bench begins with a universal frame which can be linked to additional frames. Double-Sided frame sections accommodate two users, Single-Sided frames accommodate one user and 120 frames accommodate three users.

## Finishes:

- Frame finishes available:
  - Very White
  - Platinum
  - Ebony

- Table Base size is determined by the size of the worksurface it is used with
- Switch:
  - Display with up/down memory
  - Toggle Display with Memory
  - None
- Base Mechanism
  - Extended Range Electric-Extended Height (22.6" - 48.7")
  - Fixed Height (29")

### hiSpace Double-Sided Frame (HWBFYD)

- Depths (to work with worksurface depth)
  - 48", 60"
- Widths (to work with worksurface width)
  - 46", 52", 58", 64", 70"

### hiSpace Single-Sided Frame (HWBFYS)

- Depths (to work with worksurface depth)
  - 24", 30"
- Widths (to work with worksurface width)
  - 46", 52", 58", 64", 70"

### hiSpace 120 Frame (HWBFYT)

- Depths (to work with worksurface depth)
  - 24", 30"
- Widths (to work with worksurface width)
  - 46", 52", 58"

# hispace planning with frames

The following should be considered when planning with height-adjustable frames.

## height ranges

Extended Range Electric Frame heights range from 22.6" - 48.7". The height for Fixed options is 29".

## frame depths

Double-Sided and 120 Frame depths are 48" - 60".

Single-Sided Height-Adjustable Bench Frame depths are 24" - 30".

# hispace planning with frames (continued)

## frame widths

Double and Single-Sided Height-Adjustable Bench widths are nominal.

To calculate the user space between the legs of the frame, take the nominal width and - 10.658"

## leveling

Double and Single-Sided benches allow for 1-1/8" of leveling. When more than 1-1/8" of leveling is required, a break in the bench run is necessary. A site check prior to order is required to determine floor levels.

## hispace planning with frames (continued)

### height-adjustable vs. fixed height frames

Fixed-height columns can be used to cost-reduce a project, or to gradually phase-in height adjustability as needed.

Fixed-height columns are available as an option on all hiSpace frames:

- Double-Sided
- Single-Sided
- 120 HAB
- Rectangular Tables with the exception of hiSpace Slide and hiSpace QuickConnect

Height-Adjustable Leg

Fixed Height Leg

### switches

#### Digital Display Switch with Memory (D)

- Push buttons to move table up and down
- Digital display for height indication
- Three programmable memory settings
- Error Code Read-Out
- Switch Finish: Platinum Coordinate

#### Toggle Display Switch with Memory (A)

- Up-Down Toggle for Intuitive Adjustment (lift switch or push down to move table up and down)
- Digital display for height indication
- Two programmable memory settings
- Switch Finish: Black

# hispace leveler extension block basics

Single-Sided Leveler Extension Blocks increase the leveling capabilities on single-sided frames.

**Finishes:**  
- Greystone  
- Platinum

## hiSpace Single-Sided Leveler Extension Blocks (HWBFWK)

- Quantity Option:
  - Package of 4
  - Package of 32

## hispace planning with leveler extension blocks

**The following should be considered when planning with leveler extension blocks.**

- The feet on single-sided benches allow for  $\frac{3}{8}$ " of leveling. Each Leveler Extension Block increases this range by  $\frac{3}{8}$ "
- It is recommended to stack no more than two Extension Blocks on each leveler, increasing the range to a maximum of  $1\text{-}\frac{1}{8}$ "
- When more leveling is required, a break in the run may be required
- A site check prior to order is always recommended to understand the leveling requirements

# hispace base link basics

Base Links tether hiSpace height-adjustable frames to each other and ensure proper spacing.

hiSpace Double-Sided Shown

**Finishes:**

- Very White
- Ebony
- Platinum

hiSpace Double-Sided Base Link (HWBFBD)

hiSpace Single-Sided Base Link (HWBFBS)

## hispace planning with base links

The following should be considered when planning with double and single-sided base links.

### double-sided frames

Double-Sided Base Links must be specified when connecting more than one double-sided frame together.

Base Link with no Spine Trays

Base Link with Spine Trays

Base Link with Spine Trays and Cable Riser

### single-sided frames

Single-Sided Base Links must be specified when connecting more than one single-sided frame together.

Base Link with no Spine Trays

Base Link with Spine Trays

Base Link with Spine Trays and Cable Riser

### linking double-sided frames

There is no limitation as to how many double-sided frames you can join side by side, as long as the leveling does not exceed 1-1/8" at a break in the bench and electrical requirements are maintained.

Double-Sided Base Link (MHWBFBD)

If longer runs are needed, smaller clusters can be parked beside each other without linking the bases.

Split

Split

## hispace planning with base links (continued)

The 120 HAB Frame includes a 120 base link that ties the three center legs together and serves as support structure for spine trays and spine screens.

### 120 frames

Accessories and add-ons from the current Linear HAB catalogue should be specified when planning with 120 frames:

- Spine Trays
- Spine Screens
- Desk Edge Screens

Add-ons should match the nominal size of the frame.

Frames can be linked together to create innovative workstation clusters.

Frame Links connect two frames side by side to allow power to continue between the frames and ensure accurate spacing.

Rectangular Double-Sided and 120 Frames can be connected to each other.

A single-sided run cannot be attached to a double-sided run.

Spine screens cannot be combined with desk edge screens.

## hispace spine tray basics

HiSpace Spine trays serve as a raceway for power and data cables.

- Widths:
  - 46", 52", 58", 64", 70"
- Power Module Cover
  - No Cover
  - Single Cover

### Finishes:

- Very White
- Platinum
- Ebony

### Smooth Felt Cover Finishes

- Pewter
- Lunar
- Admiral Blue
- Sumac
- River Rock

hiSpace Double-Sided Spine Tray (HWBFTH)

hiSpace Single-Sided Spine Tray (HWBFTH)

# hispace planning with spine trays

The following should be considered when planning with hiSpace spine trays.

Spine trays accommodate data and electric cables only. Spine trays are universal across the program and the same restrictions with regards to specifying electrics within the spine trays still apply.

## double-sided and 120 frames

Cables are representative only for common CAT5/6 cables. Actual cable diameters and capacity may vary.

## single-sided frames

Cables are representative only for common CAT5/6 cables. Actual cable diameters and capacity may vary.

## hispace planning with spine trays (continued)

The following should be considering when planning with Spine Trays between linear HAB and 120 HAB.

120 HAB frames are designed to be used with standard Double-Sided Spine Trays.

When planning with 120 frames, as with the Double-Sided Linear Bench, specify the width of the spine tray to match the width of the worksurface.

## hispace spine tray end cover basics

Spine Tray End Covers cap off the exposed end of the last spine tray of a bench run and are specified at each end where there are no end cable risers, end gables or end of run screens.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

hiSpace Spine Tray End Cover (HWBFTC)

## hispace single-sided frame weldment cover basics

Frame Weldment Covers are used to cap off the back of the horizontal bar on a single-sided frame.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

hiSpace Single-Sided Frame Weldment Cover  
(HWBFSC)

# hispace planning with single-sided frame weldment covers

The following should be considered when planning with the single-sided frame weldment covers.

Specify one set per workstation when there is no corridor screen.

# hispace no spine screen cover basics

The Universal Spine Tray Cover is secured by an integrated magnet and used to hide threaded inserts in the frame that are unused in certain configurations.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

**hiSpace No Spine Screen Cover Plate (HWBFTV)**

- Available in pairs

## hispace planning with no spine screen covers

The following should be considered when planning with No Spine Screen Cover Plate

When no spine tray is specified, there will be inserts left exposed on each side of the frame.

When there is no spine screen specified or if a desk edge infinity screen is specified, the inserts for the spine screen are exposed.

## hispace double-sided end gable basics

Double Sided End Gables provide a more enclosed tailored look to the Double Sided and 120 height-adjustable bench frame.

### Finishes:

- Frame finish:
  - Very White
  - Platinum
  - Ebony
- Outer Finish Options:
  - Metal (Very White or Ebony)
  - Laminate (Source Laminates or Foundation Laminates)
  - Smooth Felt (Lunar or Pewter)
- Inner Finish Options:
  - Very White
  - Ebony

### hiSpace Double-Sided End Gable (HWBCGE)

- Depths available:
  - 48", 60"

# hispace double & single-sided rectangular worksurface basics

Rectangular Worksurfaces are available with a gap to accommodate screens. Power accessibility is available through the worksurface to spine to accommodate screens and pinch clearances.

- Depths:
  - 23", 29"
- Widths:
  - 46" 52", 58", 64", 70"
- Access Door Cut :
  - None
  - Center Access Door cut out

- Grommet Cut Out Locations:
  - No Grommet
  - Left, Right and Center
  - Left and Right
  - Center and Right
  - Center and Left
  - Left and Right
  - Left

hiSpace 120 Worksurface with Square  
Corners (HWBWB T)

hiSpace 120 Worksurface with Radius  
Corners (HWBWJ T)

# hispace planning with worksurfaces

The following should be considered when planning with hiSpace Rectangular and 120 worksurfaces.

## edge trims

The following edge trim styles are available on hiSpace Double-Sided, Single-Sided and 120 worksurfaces.

Worksurfaces with Radius Corners are only available with straight trim.

Worksurfaces with Square Corners

Straight Trim

Flat Trim

Bullnose Trim

Flat Knife Trim

Worksurfaces with Radius Corners

Straight Trim

## user edge

User Edge

Double-Sided Rectangular Worksurface  
with Square Corners  
Bullnose and Full Knife trim along user edge only

User Edge

Double-Sided Rectangular Worksurface  
with Radius Corners  
Radius corners along user edge only

User Edge

120 Worksurface with Square Corners  
Bullnose and Full Knife trim along user edge only

User Edge

120 Worksurface with Radius Corners  
Radius corners along user edge only

# hispace planning with worksurfaces (continued)

## depths and widths

Worksurface depths and widths are nominal.

### Depths

When specifying worksurfaces for a Double-Sided Bench, two worksurfaces per workstation must be specified:

- Frame Depth 48" must be paired with Worksurface Depth 23", quantity 2
- Frame Depth 60" must be paired with Worksurface Depth 29", quantity 2

### Widths

All worksurfaces must have 1" clearance around the sides for a pinch gap.

# hispace planning with worksurfaces (continued)

The following should be considered when planning with hiSpace 120 worksurfaces.

The worksurface position on the frame for 120 HAB is identical to the Double-Sided Linear Bench.

The workstation footprint of 120 HAB has a slight difference in nominal width from Linear HAB.

For 120 Worksurface every size will have the extra 2.125" along that workstation footprint.

A 46" worksurface has an actual footprint of 48.125".

Worksurface size: 46" w x 23" d

Worksurface size: 46" w x 29" d

## hispace planning with worksurfaces (continued)

### grommet cut out locations for rectangular worksurfaces

- Grommet cut out locations:

- None
- Center
- Left
- Right
- Left & Right
- Center & Left
- Center & Right
- Center, Left & Right

### grommet cut out locations for 120 worksurfaces

- Grommet cut out locations:

- None
- Center
- Left
- Right
- Left & Right
- Center, Left & Right

# hispace planning with worksurfaces (continued)

## center access door cut out for rectangular worksurfaces

- Center Access Door options:
  - None
  - Center Access Door

When a Center Access Door cut out is specified on a worksurface, a hiSpace Center Access Door must be ordered separately.

In addition, hiSpace Surface Access Power Box must be ordered separately to complete the worksurface integrated solution.

## access door cut out for 120 worksurfaces

- Access Door options:
  - None
  - Left Access Door
  - Right Access Door
  - Left & Right Access Door

## hispace center access door basics

**Center Access Doors provide accessibility through the Center Access Door cut out.**

hiSpace Surface Access Power Boxes and hiSpace Center Access Doors must be specified separately but is used in conjunction with each other.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

**hiSpace Center Access Door (HWBECD)**

- Width:
  - 9"

# hispace surface access power box basics

**hiSpace Surface Access Power Boxes provide a worksurface integrated user power solution.**

hiSpace Surface Access Power Boxes and hiSpace Center Access Doors must be specified separately but used in conjunction with each other.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

**hiSpace Surface Access Power Box (HWBEAP)**

- Depth: 4"
- Width: 9"
- Configurations:
  - 3 Power
  - 2 Power + 1 USB
- Cord Length:
  - 9'
  - 10'
  - 15'
- Country of Install
  - Canada/USA
- Available in a One Table One Plug - Above and Below version: Above and Below Surface Access Power Box (YEABAP), available from *Complements: Teknion's Ergonomics & Accessories Program*

# hispace planning with center access doors & surface access power box

**The following should be considered when planning with the hiSpace Surface Access Power Box.**

hiSpace Surface Access Power Boxes and hiSpace Center Access Doors must be specified separately but used in conjunction with each other.

### hiSpace Surface Access Power Boxes and hiSpace Center Access Doors with monitor arms

It is recommended to specify two single monitor arms with hiSpace Center Access Doors and hiSpace Surface Access Power Boxes.

When Desk Edge Screen, Center Access Door are specified with 46" Worksurface, there is insufficient space for a Dual Swerv Arm (YMSS22). Minimum Worksurface size is 52" for this combination. Grommet-mounted accessories can be used as an alternative.

# hispace cable riser basics

**Cable Risers are used to conceal and provide a path to feed and mount base feed power into the benching system.**

The 120 HAB Frame includes a 120 base link that ties the three center legs together and serves as support structure for spine trays and spine screens. The 120 Link with 120 Wire Bridge and the 120 Base Link with 120 Mid Cable Rise can be specified separately.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

hiSpace Double-Sided Cable Riser - Mid (HWBECMD)

hiSpace Single-Sided Cable Riser - Mid (HWBECMS)

hiSpace Cable Riser - End (HWBECE)

hiSpace 120 Cable Riser - Mid (HWBECMT)

hiSpace 120 Wire Bridge (HWBEWT)

## hispace planning with cable risers

**The following should be considered when planning with Double and Single-Sided Cable Risers - Mid.**

- Double and Single-Sided Cable Risers - Mid attach to the Frame and will allow for the main power source to route from the floor to the workstation through the spine tray

**Double-Sided Cable Riser**

**With Spine Tray**

**Single-Sided Cable Riser**

**With Spine Tray**

### **120 Cable Riser**

The base link for 120 HAB is already included in the frame. It is fastened to the underside of the integrated 120 base link that is part of the frame.

Three types of base feed can be hosted within the 120 mid-cable riser:

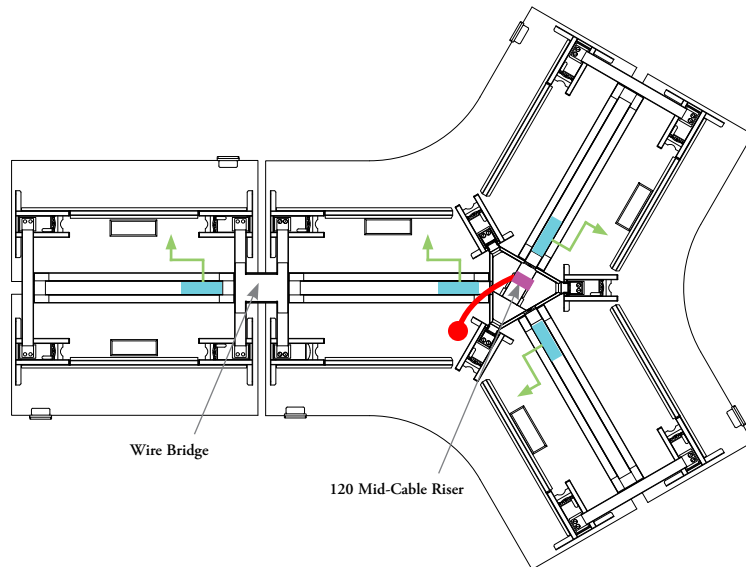

- Standard Base Feed
- Split Base Feed
- Chicago Base Feed

When feeding power through the central column is not required, a 120 wire bridge can be specified to facilitate cable travel across the three spine trays.

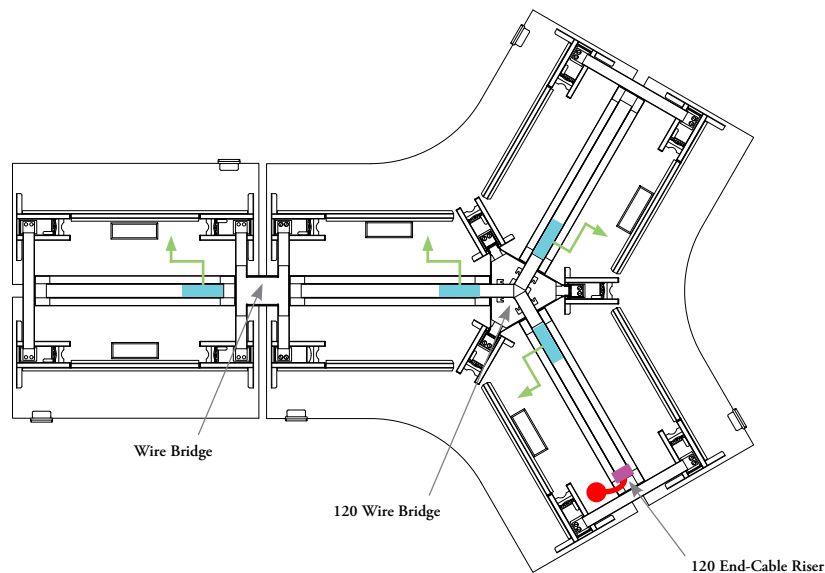

## hispace planning with cable risers (continued)

The following should be considered when planning with 120 Cable Risers.

Wiring with mid cable riser entry

-  Source (e.g. floor monument)
-  Base Feed
-  Power Module
-  Power Harness
-  Power Supply Cord (e.g. YEPD)

Wiring with end cable riser entry

## hispace base feed basics

**Base Feeds are used to connect building hardwired electrics to the modular electrics specified in the bench system**

- Base feeds can be routed into the bench system in the end or mid conditions

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

**hiSpace Base Feed (HWBEBF)**

- Provides routing for power from the floor to a Power Module through the Spine Tray
- Lengths:
  - 72" and 144"
- Wire systems include:
  - 8-Wire Isolated Ground (8T)
  - 8-Wire Dual Isolated (8K)
  - 7-Wire Non Isolated Ground (7T)
  - 7-Wire Dual Non Isolated (7K)

**hiSpace Split Base Feed (HWBEBFS)**

- Provides routings for power from the floor to a Power Module with a Wire Channel and is wired into the building power source in two locations for New York City wiring restrictions
- Lengths:
  - 18" (NYC Only) and 72"
- Wire systems include:
  - 8-Wire Isolated Ground (8T)
  - 8-Wire Dual Isolated (8K)
  - 7-Wire Non Isolated Ground (7T)
  - 7-Wire Dual Non Isolated (7K)
- Includes PVC free option if specified

**hiSpace Chicago Base Feed (HWBEBFCH)**

- Required for city of Chicago electrical code requirements
- Lengths:
  - 72" and 144"

## hispace planning with base feeds

**The following should be considered when planning with Base Feeds.**

Mid and End Cable Risers allow base feeds from either end or mid way of the bench to connect to both Double and Single-Sided Spine Trays.

**Base Feed with Double-Sided Cable Riser - Mid**

**Base Feed with End Cable Riser**

## hispace wire management basics

**hiSpace Height-Adjustable Bench provides a modular electrics option for power and data distribution.**

The following outlines the basic components of modular electrics.

### hiSpace Vertical Wire Carrier (HWBEEE)

- Mounts to Navigate Wire Channel and transfers vertical cables to the worksurface integrated center channel
- Finishes:
  - Ebony Coordinate
  - Platinum Coordinate
  - Very White Coordinate

### hiSpace Receptacle Outlet (HWBERO)

- Mounts onto the Power Module to provide access to power
- Styles include:
  - Standard 15 amp
  - T-Slot 20 amp
  - Controlled 15 amp
  - Controlled 20 amp
- Outlet configurations consist of Circuit 1, Circuit 2, Circuit 3 (used with 7T only), Circuit 5 (used with 8T and 8K only), Circuit 6 (used with 88K only), Circuit A Non Isolated Ground (use with 7T and 7K only), Circuit B Non Isolated Ground (use with 7K only)
- Finished in Platinum

### hiSpace Power Module (HWBEPM)

- Mounts in the Wire Channel and accepts outlets for hardware electrics
- Includes module bezel
- Wire systems include:
  - 8-Wire Isolated Ground (7T compatible)
  - 8-Wire Dual Isolated (7K compatible)
- PVC free option available if specified

### hiSpace Power Harness (HWBEPH)

- Routes powers from one power module to another
- Lengths:
  - 24", 48", 60", 72", 84", 96"
- Wire systems include:
  - 8-Wire Isolated Ground (8T)
  - 8-Wire Dual Isolated (8K)

### hiSpace Chicago Power Module (HWBEPMCH)

- Required for city of Chicago electrical code requirements
- Application:
  - Facing Up
- Configuration:
  - Double
  - Quad
- Receptacle Style:
  - Standard 15 Amp
  - T-Slot 20 Amp
  - Controlled 15 Amp
  - Controlled 20 Amp
- Bracket finished in Mica Platinum

### hiSpace I-Connector (HWBEIC)

- Used to join two harnesses when a single harness is not long enough

# hispace wire management basics (continued)

## hiSpace Rigid Connector (HWBELC)

- Rigid Connectors are used to join two power modules together in the same Spine Tray, when required. Specify one rigid connector for each junction.

## hiSpace Data Extender Plate (HWBEXP)

- Data Extender Plate available to order separately when more space is needed for data jack
- Finish:
  - Platinum Coordinate

## hispace planning with wire management & electrics

The following should be considered when planning with Base Feeds.

### power harness and end cable risers

When putting a Base Feed through an End Cable Riser on frame sizes 52" - 70", an extra 24" power harness is required to link the base feed to the first power module. The amount of slack from the power harness might range anywhere between 2" to 14". It may be necessary to loop the harness inside the tray in order to keep it from popping up above the spine tray lid.

# hispace planning with wire management & electrics

## (continued)

Power is routed up from the floor through a Cable Riser to the Spine Tray. From the Spine Tray, the power is then directed up through a Vertical Wire Carrier to the worksurface.

Single Power Module	
Worksurface Width	Harness Length
46	48
52	48
58	48
64	72
70	72

Double Power Module	
Worksurface Width	Harness Length
46	n/a
52	24
58	48
64	48
70	48

- The above only apply when:
- All worksurfaces in a run are the same width
  - All worksurfaces in a same run have the same # of power modules
  - All power trays should be the same direction

## hispace vertical wire carrier basics

Vertical Wire Carriers serve as a raceway for power and data cables to run from spine trays to worksurfaces.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

hiSpace Vertical Wire Carrier (HWBEEE)

## hispace felt cover organizer basics

The Felt Cover Cable Organizer acts to hide the bench's electrics control box and associated wiring.

hiSpace Felt Cover Cable Organizer (HWBEWY)

## planning with hispace felt cover organizer

The following should be considered when planning with felt cover organizer for 120 HAB.

Cable Organizer is incompatible with 46W 23D Worksurface

It is possible to specify two cable organizers on wider worksurfaces.

## hispace wire bridge basics

Wire Bridges are used to pass cables between two height-adjustable bench frame spine trays, specifically when a cable riser has not been specified.

**Finishes:**

- Finishes available:
  - Very White
  - Platinum
  - Ebony

hiSpace Wire Bridge (HWBEWB)

## hispace double & single-sided screens overview

There are five types of screens designed to add privacy in double and single-sided height-adjustable bench applications.

### Double-Sided Spine Screens

- Attach to a Double-Sided bench frame and are centered between worksurfaces
- Solid and Framed Fabric options
- Only available with a gap

### Double-Sided Desk Edge Screens

- Attach to a individual worksurfaces on a Double-Sided frame
- Pairs with radius corner worksurface
- Infinity and Smooth Felt options
- Only available with a gap

### Double-Sided End of Run Screens

- Run lengthwise at the end of a Double-Sided bench for increased privacy
- Solid and Framed Fabric options

### Single-Sided Corridor Screens

- Attach along the back of Single-Sided worksurfaces
- Solid and Framed Fabric options

### Lateral Screens

- Smooth Felt Lateral Screens provide screening between adjacent workstations
- Attach to side edge of the worksurface
- Smooth Felt options

# hispace double-sided spine screen basics

Double-Sided Spine Screens run along the length of the bench and provide privacy and functionality.

## Finishes

- Solid Screen Finish:
  - Source Laminate
  - Foundation Laminate
- Fabric Screen Finish:
  - Panel Fabrics
- Bracket Finish
  - Foundation
  - Mica
  - Accent

- Height: 51"
- Depth: 46", 52", 58", 64", 70"

hiSpace Double-Sided Spine Screen - Solid (HWBCTS)

- Corner Option:
  - Square
  - Round

hiSpace Double-Sided Spine Screen - Framed Fabric (HWBCTF)

## hispace planning with double-sided spine screens

**The following should be considered when planning with Double-Sided Spine Screens.**

There is 2.03" gap between Double-Sided Spine Screens.

There is a 3" gap between worksurfaces provides a 1" pinch gap on each side of the thickest spine screen option.

### datum height

# hispace double-sided desk edge screen basics

**Double-Sided Desk Edge Screens** Desk edge screens provide privacy and raise and lower with the worksurface when user adjusts the height for their workstation.

- Height: 42", 51"
  - Smooth Felt only available at 42"h
- Depth: 46", 52", 58", 64", 70"

## Finishes

- Infinity Screen Finishes:
  - Panel Fabric
  - Upholstery Fabric
- Smooth Felt Finishes:
  - Lunar
  - Warm Ash
  - Strata
  - Pewter
- Bracket Finish:
  - Foundation
  - Mica
  - Accent

hiSpace Double-Sided Desk Edge Screen – Infinity (HWBCDX)

hiSpace Double-Sided Desk Edge Screen – Smooth Felt (HWBCDZ)

- Corner Option:
  - Square
  - Round

## hispace planning with double-sided desk edge screens

**The following should be considered when planning with Double-Sided Desk Edge Screens.**

There are two datum heights available with Double-Sided Desk Edge Screens:

- Height: 42", 51"
  - Smooth Felt only available at 42"h

There is a 0.5" wire gap on a Double Sided Bench which will allow for a 1" pinch gap when specifying Double-Sided Desk Edge Screens on back to back worksurfaces.

Double-Sided Desk Edge Screen widths must match the same width as the worksurface.

# hispace planning with screens for 120 frames

120 frames are designed to be used with standard Double-Sided Spine Screens and Desk Edge Screens.

As with the Double Sided Linear Bench, specify the width of the screen to match the width of the workspace.

Double Sided Spine Screens

Double-Sided Desk Edge Screens

## hispace double-sided end of run screen basics

Double-Sided End of Run Screens attach to the frame to provide privacy at the end of the run.

### Finishes

- Solid Screen Finishes:
  - Source Laminate
  - Foundation Laminate
- Framed Fabric Screen Finishes:
  - Panel Fabric
- Bracket Finish
  - Very White
  - Platinum

- Height: 51"
- Width: 48", 60"

hiSpace Double-Sided End of Run Screen - Solid (HWBTWS)

- Corner Option:
  - Square
  - Round

hiSpace Double-Sided End of Run Screen - Framed Fabric (HWBTWF)

# hispace planning with double-sided end of run screens

The following should be considered when planning with Double-Sided End of Run Screens.

There is one datum height available with Desk Edge Screens:

120 HAB frame can also accommodate the same add-ons and accessories.

End of Run Screen

120 VS Linear Double Sided Bench

## hispace single-sided corridor screen basics

Single-Sided Corridor Screens provide enclosure along the back of single-sided benches in a corridor application.

### Finishes

- Solid Screen Finishes:
  - Source Laminate
  - Foundation Laminate
- Framed Fabric Screen Finishes:
  - Panel Fabric
- Screen Bracket finish:
  - Black

• Height: 51"

• Width: 46", 52", 58", 64", 70"

hiSpace Single-Sided Corridor Screen - Solid (HWBLSS)

hiSpace Single-Sided Corridor Screen - Framed Fabric (HWBLSF)

# hispace planning with single-sided corridor screens

The following should be considered when planning with Single-Sided Corridor Screens.

There is one height when planning with Corridor Screens:

There is a 0.125" gap between screens.

# hispace single-sided corridor screen alignment clip - solid basics

Single-Sided Corridor Screens provide enclosure along the back of single-sided benches in a corridor application.

### Finishes

- Clip finish:
  - Foundation
  - Mica
  - Accent

### hiSpace Single-Sided Corridor Screen Alignment Clip - Solid (HWBLBS)

- Height: 51"
- Width: 46", 52", 58", 64", 70"

# hispace planning with single-sided corridor screen alignment clip - solid

The following should be considered when planning with hiSpace Single-Sided Corridor Screen Alignment Clips - Solid.

The alignment clip varies on the screen type.

## hispace smooth felt lateral screen basics

Smooth Felt Lateral Screens provide screening between adjacent workstations.

### Finishes

- Smooth Felt finish:
  - Warm Ash
  - Pewter
  - Lunar
  - Strata
- Base Finish:
  - Foundation
  - Mica
  - Accent

### hiSpace Smooth Felt Lateral Screen (HWBCLZ)

- Height: 42"
- Depth: 24", 30"
- Corner Profile:
  - Radius
  - Straight
- Screen Fit:
  - Partial
  - Full
  - Extended
- Orientation:
  - Left
  - Right

# hispace planning with smooth felt lateral screens

The following should be considered when planning with Smooth Felt Lateral Screens.

There are three different screen fits available:

- Partial
- Full
- Extended

Radius Corner

Square Corner

Smooth Felt Lateral Screens with Radius Corners have three different profiles when specifying the screen fit:

**Partial Fit**  
•Top front radius

**Full Fit**  
•Top and bottom front radius

**Extended Fit**  
•Top and bottom front radius

## handedness

Smooth Felt Lateral Screens are specified as left or right-handed screens, based on the user's orientation

## hispace low profile bag drop basics

The Low Profile Bag Drop offers storage for personal items and work bag storage below the worksurface with both Double and Single-Sided Height-Adjustable Bench planning.

### Finishes

- Case Finish options:
  - Very White
  - Platinum
  - Ebony
- Front Finish options:
  - Foundation
  - Mica
  - Accent
- Base Finish:
  - Crisp Grey
- Smooth Felt Liner options:
  - Smooth Felt finishes

hiSpace Bag Drop (HWBAWR)

# hispace low profile bag drop finishes

The following outlines the finishes available with the Low Profile Bag Drop.

Very White Case

Platinum Case

Ebony Case

## hispace workstation name plate basics

hiSpace Workstation Name Plate can be magnetically attached onto a screen.

- 1 Mounting Bracket
- 2 Molded Magnet Chassis
- 3 Whiteboard Laminate
- 4 Transparent Cover Sheet
- 5 Painted Metal Bezel

### Finishes

- Bracket:
  - Foundation
  - Mica
  - Accent
- Bezel:
  - Foundation
  - Mica
  - Accent

### hiSpace Workstation Name Plate (HWBANP)

#### Application:

- Hang-on Single-Sided
- Hang-on Double-Sided

#### Screen Type:

- Solid Screen
- Framed Fabric Screen
- Smooth Felt

# planning with hispace workstation name plate

**The following should be considered when planning with hiSpace Workstation Name Plate.**

It can be used in two different ways:

- Whiteboard: for non-permanent use such as hot-desking or co-working applications
- Custom Template: for more permanent use, customers can also print their own material.

The name plate takes a 7.5" w x 2" h piece of paper or cardstock that can be sealed behind a plastic sheet.

Specify the name plate based on the correct screen application. Single-sided and double-sided options are available based on the screen type. Hang-on Double-Sided is not available for Infinity and Smooth Felt Screens.

## HWBFYD hiSpace Double-Sided Frame

The hiSpace Double-Sided Frame is used with two Double-Sided Worksurfaces to create a Height-Adjustable or Fixed Height Bench workstation.

### WHAT'S INCLUDED

Each frame includes 2 electric height-adjustable mechanisms with switch (height-adjustable only), 4 leg columns (height adjustable or fixed height), 2 leg braces, 2 top frames and 4 levelers.

### NOTES

Switch is not included with fixed height option.

Requires two Double-Sided Rectangular Worksurfaces (HWBWBD/HWBWJD).

Switches have programmable settings.

All electrical base mechanisms have a 0.2 watt resting power draw (height-adjustable only).

HWBFYS  
hiSpace Single-Sided Frame

The hiSpace Single-Sided Frame is used with two Single-Sided Worksurfaces to create a Height-Adjustable or Fixed Height Bench workstation.

WHAT’S INCLUDED

Each frame includes 1 electric height-adjustable mechanism with switch (height-adjustable only), 2 leg columns (height adjustable or fixed height), 2 leg braces, 1 top frame, and 2 feet.

NOTES

Switch is not included with fixed height option.

Requires one Single-Sided Rectangular Worksurface (HWBWBS/HWBWJS).

Switches have programmable settings.

All electrical base mechanisms have a 0.2 watt resting power draw (height-adjustable only).

PRODUCT OPTIONS

HWBFT  
hiSpace 120 Frame

The hiSpace 120 Frame is paired with 120 Worksurface with Square Corners (HWBWB T) or 120 Worksurface with Radius Corners (HWBWJ T) to create a Height-Adjustable or Fixed Height 120 Bench Station.

WHAT’S INCLUDED

Each 120 Frame includes 3 bench stations, 9 leg columns (height-adjustable or fixed) with levelers, 6 cross channels, 3 end leg braces, 1 mid leg brace, 3 switches for height-adjustable stations, appropriate hardware.

NOTES

Switch is not included with fixed height option.

Requires three 120 Worksurfaces (HWBWB T/HWBWJ T).

Include Covers/Gables to conceal leg braces.

1-1/8" of leveling.

All electric base mechanisms have a 0.2 watt resting power draw and use a 240V universal control box (height-adjustable only).

HWBANP  
hiSpace Workstation Name Plate

Single-Sided      Double-Sided

**WHAT’S INCLUDED**  
1 metal bracket, 1 name plate consisting of 1 metal bezel and 1 plastic chassis, 1 transparent cover sheet, 1 whiteboard, information sheet with link to template.

**NOTES**  
Workstation Name Plate magnetically attaches onto the metal bracket. Single-sided and double-sided options are available for solid, framed fabric and smooth felt screens. Infinity screen for single-sided application only.

- Workstation Name Plate can be used in two different ways:
- Whiteboard - for non-permanent use such as hot-desking or co-working applications
  - Printed Template - for more permanent applications, users can print their name plate using templates provided on product website. Customizable templates are available for download at [www.teknion.com/workstation-nameplate](http://www.teknion.com/workstation-nameplate). Printed template is placed behind the transparent cover sheet for added protection.
