# Subdivide by Luum

Subdivide harks back to the Bauhaus, where architectural drawings and plans were drafted with the guiding principles and foundation of modernism. Utilizing a loom with a large horizontal repeat capability, we have created a large pattern of linework and blocks that is designed to be cut and sewn without having to match the repeat. Natural fibers on the surface create a soft hand while a nylon warp provides the strength to meet 100,000 double rubs.
