

kuskoa bi

# kuskoa bi by Alki

## product information

Offered through a partnership with Alki in Itsasu, France, Kuskoa Bi is a statement piece that you can sit on. This unique bioplastic design is derived from plant-based renewable resources. The rugged, enveloping shell can be finished two ways—upholstered in total, or embellished with just an upholstered seat pad. The shell is cut out in such a way as to optimize back and arm support for long stretches of work. Two desk versions offer supreme mobility and are available with a 4-star swivel and 5-star caster in two powder-coat finishes. Rigid bioplastic design and powder-coated base allow use in high-traffic spaces while maintaining a high-quality finish. The guest chair sits firmly on a solid oak trestle available in five finishes.

### Designer
