lines

#### DESIGN WITHOUT COMPROMISE

Designed and developed in Europe to meet the needs of today's businesses, Lines is the building block that creates a complete office workspace.

A stylish desking system, Lines' modularity provides planning flexibility, while a wide range of materials and finishes permits a range of looks. Interpret space in new ways, adapt quickly and easily to changing situations, define different environments and accommodate a range of workstyles using Lines.

Seating shown in brochure: Task/Fitz, Executive/Marini, Guest/Vignette

lines

#### ADJUSTABLE

Height-adjustable legs (from 620mm-820mm) enable Lines to be personalized to suit the ergonomic needs of each user. Legs are also recessed to provide added space under the desk – allowing greater movement between workstations.

Legs are affixed to a structural beam underneath the worksurface. These beams enable the legs to be shared across adjacent desks or benches, to create a clean, crisp look and to realize cost savings.

CONNECTABLE

Lines' structure utilizes metal-to-metal components. These durable components allow Lines to be endlessly reconfigured to meet evolving workplace needs. Promote collaboration and communication by creating infinite spans using the modular frame.

Accessories such as monitor arms, lighting and CPU holders are beam-mounted, freeing up valuable desk space.

#### COMPLETE TOOLKIT

A thoughtful and comprehensive selection of features and options means you can create a complete office landscape. A matching family of accessories and storage allows you to add function while maintaining a consistent aesthetic throughout.

Generate a variety of layouts from Lines' selection of worksurface shapes and sizes, beams and legs. Organize the space using mounted and freestanding storage, or accessorize with frame-based accessories and shelving.

#### RESPONSIVE

Lines is agile – quickly and easily reconfigurable, so you can respond rapidly to changing or evolving forms of work. Accelerate specification and installation time using Line's succinct and interchangeable kit of parts. Get up and running quickly or minimize downtime during moves or reconfigurations.

REFINED AND ELEGANT

With its sleek aesthetic, Lines is an elegant desking system that complements any modern space. Its delicate and graceful design makes even the smallest space feel light, airy and roomy. A careful attention to detail results in every functional element also being a design detail.

COLLABORATIVE

A collection of meeting tables is available in an array of shapes and sizes to suit any environment. Create spaces to meet, interact and collaborate while maintaining a consistent look throughout the office.

A central service channel in the table surface enables convenient desk-height access to power and data.

Intermediate cable riser efficiently brings power and cable to the workstation and complements Lines' clean look. Solid cable tray keeps cables tidy and out-of-sight

Desk-height shelf for additional storage

A range of surface thicknesses and finishes is available, including a twin edging option that creates the appearance of a slimmer worksurface

Height Flexibility Kit from 15mm-75mm

#### CLEVER CABLING

Lines' beam structure enables quick and simple cabling. Beam-mounted solid metal cable trays accommodate cables, power bars and transformers while maintaining a clean and tidy appearance. Trays also facilitate easy access to wire management without requiring any major dismantling of the product.

Intermediate cable risers enable large amounts of cables to be brought and distributed efficiently to each workstation. For lighter cabling needs, a slinky cable riser is also available.

Return storage for personal items

Central service channel for meeting tables provides desk-height power and data

Monitor arm affixes directly to the beam. Power block brings power and data to desk height

Standard screen creates a light and airy look and enables for personal organization accessories to be hung from the rail

#### PLANNING POSSIBILITIES

The Lines range of furniture is manufactured to the highest standards utilizing the latest production techniques and is fully compliant to British standards as certified by FIRA in the UK. Lines carries a lifetime manufacturer's guarantee, subject to our standard terms and conditions.

ENVIRONMENTALLY RESPONSIBLE

Did you know that eighty percent of a product's environmental impact is determined at the design stage? Lines was designed to meet Teknion's DfE guidelines, ensuring its sustainability. By formalizing DfE into a set of nine guidelines, Teknion shapes a product's development from material selection to

manufacturing processes to end-of-life strategies. Lines is also GREENGUARD Certified for Indoor Air Quality.
