Dossier

The private office, long a distinguishing feature of the corporate world, is evolving into a new kind of space. The emerging private office is more accessible and adaptable, reflecting the emergence of new technologies, changes in workforce demographics and a shift to collaborative workstyles.

Dossier™ is classic caseworks furniture with a clean architectural look. Layered surfaces and upper storage combine in multiple ways to meet user needs and spatial constraints. Low storage doubles as bench seating for visitors. Technology support is fully integrated into the design. Fine materials and refined details offer an aesthetic of quiet elegance.

Dossier offers a fresh interpretation of the executive office with a lighter, more open expression. Open-ended runoffs are ideal for in-office meetings. Storage units house flat screen displays for group presentations. Wall panels create functional work walls and a visually integrated workspace.

Modular storage units integrated with wall panels create a unified suite. Side open cabinets are easily accessed, reduce clutter and follow the same dimensional grid as wall hung storage. Wall hung storage is available 12 inches deep for narrow offices, as well as 15½ and 18 inches deep. Credenzas serve at working height or at a low height for casual seating.
