w/r/s

W/R/S overview

A CANVAS FOR UTILITY
AND AESTHETICS

W/R/S™ — Teknion's wall rail system — links architecture to furniture. Walls, by nature, tend to be limiting and create boundaries by defining space. In contrast, W/R/S provides users the freedom to create highly functional and visually stimulating work environments in these very same spaces.

Key W/R/S attributes:

- Adaptability – multi-functional frame options permit variances in product application, configuration and finish selection
- Reconfiguration – fully modular system facilitates cost-effective reconfiguration or complete relocation

- Integration – W/R/S complements aesthetic and functional qualities of other Teknion furniture for a balanced product mix
- Custom Look – standard products achieve the appearance of made-to-order furnishings

DESIGNED FOR THE ENVIRONMENT

Teknion incorporates sustainable principles and practices into the development and manufacture of all its products. In design and construction, W/R/S contributes to several LEED (Leadership in Energy and Environmental Design) Credits:

- GREENGUARD® Certified for Indoor Air Quality
- Building Reuse
- Resource Reuse
- Recycled Content
- Innovation in Design
- Low-Emitting Materials

Adaptability

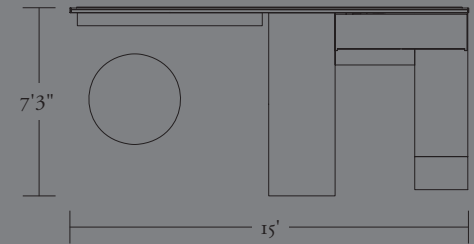

W/R/S not only enables new ways to plan with building walls, but offers greater freedom to customize with multiple frame options and fascia and storage configurations, expanding workspace utility.

UNIQUE FRAME OPTIONS

- Full-height frames with standard or electrical access baseboards range in 6-inch incremental widths from 48 to 240 inches
- Frames are offered at installation heights of 30, 66, 72 and 84 inches
- Frames without baseboards offer cost-effective, alternate planning options to the full-height frame
- Add-on frame kits modify existing applications, adding cable access or furniture components without disrupting the original installation
- Frames suspend 6 inches above the floor, allowing clearance for building baseboards and heaters

FASCIAS AND STORAGE

- Fascias — including Laminate, Tackable Fabric, Whiteboard, Accessory Rail and Wood — are available in 6-inch width increments from 24 to 96 inches for large uninterrupted spans
- Fascias and storage of different heights and widths mount side-by-side off-modularly, or in 6-inch height increments for maximum planning diversity

Metrix,
Upholstery – Leather,
White

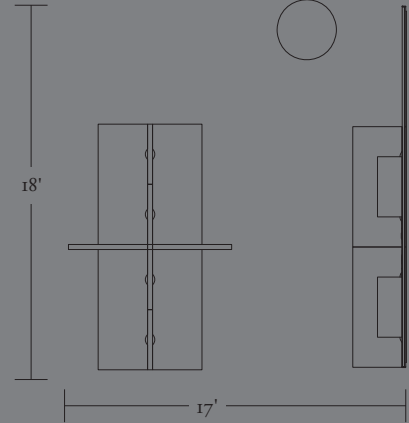

^
Different fascia options can be applied within the same frame to create an aesthetic wall mosaic with functional diversity.

v
Frames with below-worksurface electrical access baseboards provide easy access to building power and data sources.

Reconfiguration

W/R/S is designed to support change and easily reconfigures without the need for tools. Component options and placement are variable and reusable, repurposing assets while controlling inventory management.

- Fascia options migrate within the same frame profile, helping balance functional needs and aesthetics with economics
- Furniture components mount off-module for simplified planning, conversion and optimal use of space and inventory
- Fascias, storage and worksurfaces mount anywhere along the horizontal rail and are easily interchanged or repositioned, accommodating personal preferences and changes in workstyle

STORAGE:
Mica, Iced Emerald

SEATING:
t-3, Pedestal Seats,
Spinner Stool,
Upholstery –
SmartLeather, Ebony

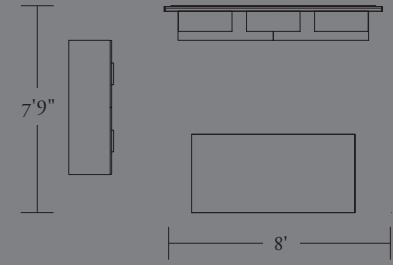

Fascias with cutouts offer face-mounted access to power/data at worksurface height. Accessory Rail Fascias accommodate mounting of monitor arms, shelves and personal organizers.

Integration

The strength of W/R/S lies in its ability to be specified with a wide range of furniture styles, from private offices to collaborative spaces. W/R/S was designed to integrate with Teknion's product portfolio and comprehensive fabrics and finishes program, creating unified furniture ensembles across the entire building floor and greatly expanding planning capabilities.

- W/R/S storage — including Floating, Book, Metal and Glass Shelves, and Cubbies — can be used independently or in combination with storage units from various Teknion systems and casegoods product lines
- W/R/S fabric fascias are offered in Teknion panel fabrics for cross-compatibility
- W/R/S fascias and storage are offered in the same complementary materials and finishes as other Teknion product lines, including: laminate, natural veneer and Flintwood (Teknion's reconstituted wood)

W/R/S storage (from top to bottom):
Floating Shelf, Cubby and Book Shelf.

Custom look

In design and function, W/R/S effectively becomes an extension of the product line with which it is applied. Whether specified in standalone applications or configured with complementary Teknion product lines and finishes, W/R/S gives standard furniture the appearance of custom-made craftsmanship.

- Wall frame and furniture suspend with minimal visible supports for a clean, refined design
- Wall frame dressed and furnished to user specifications acts as an aesthetic and architectural canvas
- 2-inch-thick clear anodized frame expresses strength and rigidity
- Off-modular capabilities increase planning versatility

SHOWN: W/R/S with Cana wood casegoods

W/R/S FASCIAS: Wood – Natural Veneer, Walnut on Cherry

DESK/CREDENZA: Natural Veneer, Walnut on Cherry

STORAGE: Natural Veneer, Walnut on Cherry

SEATING: Aarea guest, Marini task, Upholstery – Leather, Chocolate, Frame – Polished Aluminum

Upholstery – Leather, Chocolate, Frame – Natural Veneer, Walnut on Cherry

The look and function of a workspace is easily converted by interchanging a Wood Fascia with a Fabric Tackboard Fascia (shown in Panel Fabric, Peru, Puerto) and Accessory Rail Fascia.

Power/data management

FRAME WITHOUT BASEBOARD

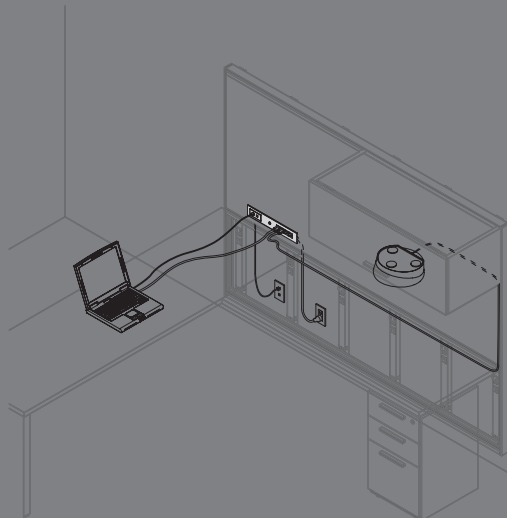

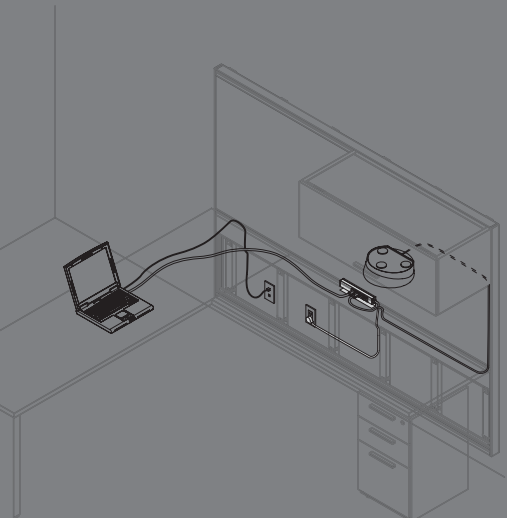

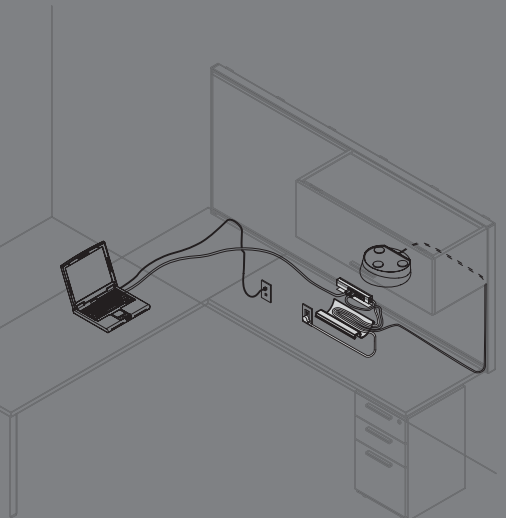

- Simple and cost-effective, frames without a baseboard provide unobstructed access to power/data wall outlets
- Under-worksurface wire trays neatly manage and route cables to the building source
- Desk clamp Power Rods — available from Teknion's Complements program — provide the option of worksurface-height plug-in access
- A vertical wire cover directs wires from overhead storage lights to above- or below-worksurface power level

FRAME WITH ELECTRICAL PASS-THROUGH BASEBOARD

- Frames with an electrical pass-through baseboard house and manage cables within the wall cavity, providing continuous wire feed-through
- Can be used in combination with desk clamp Power Rods — available from Teknion's Complements program — for the option of worksurface-height plug-in access
- A vertical wire cover directs wires from overhead storage lights to above- or below-worksurface power level

FASCIA WITH POWER/DATA CUTOUT

- Fascias with integrated power/data cutouts provide face-mounted access above the worksurface; wire management is housed and routed within the wall cavity
- W/R/S Powerbar with cover provides plug-in access at desk height
- Can be used in combination with under-worksurface wire trays to handle excess cables
- A vertical wire cover directs wires from overhead storage lights to above- or below-worksurface power level

TEKNION EMBRACES CHANGE AND ITS INNATE POSSIBILITIES. OUR CULTURE IS ONE OF INNOVATION. IN THAT SPIRIT, WE HAVE STEPPED FORWARD TO INTEGRATE SUSTAINABLE PRINCIPLES AND PRACTICES INTO THE DESIGN, MANUFACTURING AND MARKETING OF OUR PRODUCTS.

TEKNION PRODUCTS PERFORM INDEPENDENTLY AND IN CONCERT, COMBINING IN VIRTUALLY UNLIMITED CONFIGURATIONS. OUR PHILOSOPHY EMBRACES DESIGN AS ONE OF THE BEST TOOLS WE HAVE FOR REALIZING THE BENEFITS OF BUSINESS, WHILE ALSO STRIVING TO REACH SUSTAINABLE GOALS.

WE HAVE LEARNED FROM DESIGN THAT CHANGING A SINGLE DETAIL ALTERS THE WHOLE. EVERY INCH MAKES A DIFFERENCE. EVERY LEAP IS THE SUM OF MANY SMALL STEPS.

TEKNION CREATES FURNITURE THAT CONNECTS PEOPLE, TECHNOLOGY AND SPACES; INTEGRATED DESIGN WITH NEW POSSIBILITIES FOR A HEALTHY, PRODUCTIVE WORLD TOMORROW AND THE DAY AFTER.
